APPLIED MATHEMATICS AND COMPUTATION

Contents

Abstracted/Indexed in: Applied Mechanics Reviews/Biological Abstracts/Cambridge Scientific Abstracts/Computing Reviews/INSPEC Mathematical Reviews/Science Citation Index Expanded™/Web of Science℠/Sci Search®/CompuMath Citation Index®/ Current Content®–Engineering, Computing & Technology Edition/ISI Alerting Services℠. Also covered in the abstract and citation database SCOPUS®. Full text available on ScienceDirect®

Review Articles

H. Ferchichi and S.M. Aouadi, Numerical stability for a dynamic Naghdi shell 2483

I.E. Inan, D. Kaya and Y. Ugurlu, Auto-Bäcklund transformation and similarity reductions for coupled Burger's equation 2507

Research Articles

S. Di Rocco, D. Eklund, A.J. Sommese and C.W. Wampler, Algebraic $\mathbb{C}^*$-actions and the inverse kinematics of a general 6R manipulator 2512

P. Alonso, J. Delgado, R. Gallego and J.M. Peña, A collection of examples where Neville elimination outperforms Gaussian elimination 2525

X. Yan, Y. Wu and C. Zhong, Uniform attractors for impulsive reaction–diffusion equations 2534

G. Senthil, G. Jayaraman and A.D. Rao, A variable boundary method for modelling two dimensional free surface flows with moving boundaries 2544

L.J. Alvarez-Vázquez and F.J. Fernández, Optimal control of a bioreactor 2559

A.M.A. El-Sayed and H.H.G. Hashem, Monotonic positive solution of a nonlinear quadratic functional integral equation 2576

X. Liu, Stabilization of switched linear systems with mode-dependent time-varying delays 2581

N.K. Vitanov, Z.I. Dimitrova and H. Kantz, Modified method of simplest equation and its application to nonlinear PDEs 2587

A. Malik, F. Chand and S.C. Mishra, Exact travelling wave solutions of some nonlinear equations by $\left(\frac{G'}{G}\right)$-expansion method 2596

S.-F. Chen, Delay-dependent stability for 2D systems with time-varying delay subject to state saturation in the Roesser model 2613

E. Misirli and Y. Gurefe, Exact solutions of the Drinfel'd–Sokolov–Wilson equation using the Exp-function method 2623

X. Geng and G. He, Darboux transformation and explicit solutions for the Satsuma–Hirota coupled equation 2628

J.I. Ramos and C.M. García-López, A Volterra integral formulation for determining the periodic solutions of some autonomous, nonlinear, third-order ordinary differential equations 2635

W.T. Sulaiman, A note on $|A|_k$ summability factors of infinite series 2645

A.J. Mohamad Jawad, M.D. Petković and A. Biswas, Soliton solutions of a few nonlinear wave equations 2649

X. Xiao, Improving speed of convergence for the prices of European options in binomial trees with even numbers of steps 2659
