7 February 2019 / Vol 566 / Issue No 7742

THIS WEEK

EDITORIALS

- 7 **DRUG DISCOVERY**
Dark chemistry
Ultra-large libraries let scientists trawl the chemical universe for new drugs
- 7 **MICROBIOLOGY**
Gut feeling
Once-tenuous links between the gut and brain now anchor a field buzzing with potential

WORLD VIEW

9 We need to talk about systematic fraud

Jennifer Byrne
Crack down on deliberate deception in the science literature — starting with an honest conversation

RESEARCH HIGHLIGHTS

- 10 **SELECTIONS FROM THE SCIENTIFIC LITERATURE**
Hot-pink squirrels / The pain of sleepless nights / Volcanoes that chill / Screen-time warning signs / Lung cancer's microbial culprits

SEVEN DAYS

- 12 **THE NEWS IN BRIEF**
Macedonia by another name / Neutrino hunt revs up / Australian river authority in hot water / Elsevier's stand-off with libraries / A pill for sleeping sickness

TECHNOLOGY

141 TOOLBOX

Bitcoin for the biological literature
How blockchain technology is filtering into scientific publishing

CAREERS

143 TRANSITIONS

The call of home
Spotlight on researchers who choose to return home after training abroad

145 CAREER BRIEFS

NEWS IN FOCUS

- 15 **CHINA**
Gene-edited monkey clones at heart of effort to transform biomedicine
- 16 **POLITICS**
US university puts stop to research collaboration with Chinese firm Huawei
- 17 **TECHNOLOGY**
Star Trek-inspired 3D printer creates whole structures out of resin and light
- 18 **EARTH SCIENCE**
US-India radar satellite will focus on Antarctic at Arctic's expense
- 19 **BIOSECURITY**
Machine learning tapped to stop bioterrorists from hacking DNA
- 20 **LAW**
Backlash mounts against plan to change US gender-discrimination law
- 20 **SPACE**
Turkey looks to the stars as it sets up its first official space agency

FEATURES

- 22 **DISASTERS**
Death counters
How Hurricane Maria bolstered efforts to tally those who die in wars and storms
- 26 **CHEMISTRY**
The fluorine detectives
Chemists go back to basics to discover why a class of pollutants harms health

COMMENT

FOOD SECURITY

Four steps to feed cities

Improve farming and land use while cutting meat-eating and waste, urge Baojing Gu and colleagues **PAGE 31**

BOOKS & ARTS

- 35 **PALAEONTOLOGY**
How Neanderthal minds took flight
Bernard Wood
- 36 **HISTORY**
Rebellion at the Royal Society
Rebekah Higgitt
- 37 **BOOKS IN BRIEF**

CORRESPONDENCE

- 39 Follow US farmers on advocacy / Create safe site for Javan rhinos / A support network for scientists / Don't discard data on mesenchymal stem cells / Aviation history amended

OBITUARY

- 40 **Michael F. Atiyah (1929–2019)**
Michael J Barany

FUTURES

- 148 **The experiment**
Michael Adam Robson

RESEARCH

NEW ONLINE

41 Papers published this week at nature.com

NEWS & VIEWS

42 STRUCTURAL BIOLOGY

Excitatory receptors in close-up

Structures of a class C G-protein-coupled receptor

Karen J Gregory [SEE ARTICLE P.79](#)

43 BIOTECHNOLOGY

On the road to a gene drive in mammals

Method developed to engineer super-Mendelian inheritance in mice

Bruce R Conklin [SEE LETTER P.105](#)

45 QUANTUM PHYSICS

A traffic jam of light

Photons organized into a phase of matter called a Mott insulator

Kaden R A Hazzard [SEE ARTICLE P.51](#)

46 AGEING

An evolving picture of cell senescence

A role for the retrotransposon LINE-1 in late senescence

Bennett Childs & Jan van Deursen

[SEE ARTICLE P.73](#)

48 CLIMATE SCIENCE

Fate and future role of polar ice sheets

How mass loss from polar ice sheets will affect Earth's climate

Hélène Seroussi

[SEE ARTICLES P.58 & P.65](#)

49 PHYSIOLOGY

A metabolic role for gut immune cells

Cells in the gut's lining have a dual immune and metabolic role

Daria Esterházy & Daniel Mucida

[SEE LETTER P.115](#)

ARTICLES

51 **QUANTUM PHYSICS** A dissipatively stabilized Mott insulator of photons
R Ma et al. [SEE N&V P.45](#)

58 **CLIMATE SCIENCE** Revisiting Antarctic ice loss due to marine ice-cliff instability
T L Edwards et al. [SEE N&V P.48](#)

65 **CLIMATE SCIENCE** Global environmental consequences of twenty-first-century ice-sheet melt
N R Golledge et al. [SEE N&V P.48](#)

73 **AGEING** L1 drives IFN in senescent

ON THE COVER

Melting point

Two papers in this issue focus on melting ice sheets. Nicholas Golledge and colleagues refine simulations to show that future ice-sheet melt will increase sea level by up to 25 cm by 2100 and slow ocean circulation. Tamsin Edwards and colleagues find that ice-cliff collapse is not required to explain past rises in sea level and predict only a 5% chance that the Antarctic contribution to sea-level rise will exceed 39 cm by 2100. [PAGES 48, 58 & 65](#)

cells and promotes age-associated inflammation
M D Cecco et al. [SEE N&V P.46](#)

79 **STRUCTURAL BIOLOGY** Structural insights into the activation of metabotropic glutamate receptors
A Koehl et al. [SEE N&V P.42](#)

LETTERS

85 **ASTRONOMY** Formation of massive black holes in rapidly growing pre-galactic gas clouds
J H Wise et al.

89 **OPTOMECHANICS** Real-time vibrations of a carbon nanotube
A W Barnard, M Zhang, G S Wiederhecker, M Lipson & P L McEuen

94 **BIOCHEMISTRY** An N-nitrosating metalloenzyme constructs the pharmacophore of streptozotocin
T L Ng, R Rohac, A J Mitchell, A K Boal & E P Balskus

100 **NEUROSCIENCE** Onset of differentiation is post-transcriptionally controlled in adult neural stem cells

A Baser et al.

105 **BIOTECHNOLOGY** Super-Mendelian inheritance mediated by CRISPR-Cas9 in the female mouse germline
H A Grunwald et al. [SEE N&V P.43](#)

110 **IMMUNOLOGY** GPR31-dependent dendrite protrusion of intestinal CX3CR1⁺ cells by bacterial metabolites
N Morita et al.

115 **PHYSIOLOGY** Gut intraepithelial T cells calibrate metabolism and accelerate cardiovascular disease
S He et al. [SEE N&V P.49](#)

120 **VIROLOGY** A quantitative approach for measuring the reservoir of latent HIV-1 proviruses
K M Bruner et al.

126 **CANCER MODELS** Tissue curvature and apicobasal mechanical tension imbalance instruct cancer morphogenesis
H A Messal et al.

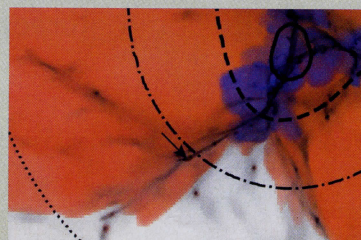

131 **STRUCTURAL BIOLOGY** Rubisco condensate formation by CcmM in β -carboxysome biogenesis
H Wang et al.

136 **CELL BIOLOGY** Structure of the post-translational protein translocation machinery of the ER membrane
X Wu, C Cabanos & T A Rapoport

ASTRONOMY

Seeding stars

Dynamics of structure formation leads to supermassive black holes. [PAGE 85](#)

OUTLOOK

Supplement to 7 February 2019 / Vol 566 / Issue No 7742

TEA

Turn to page 40

S1 EDITORIAL

Tea

Herb Brody

S2 AGRICULTURE

Making tea

The origins of the tea plant

S5 PERSPECTIVE

Better research for better tea

Tea quality will benefit from an improved research culture, says *Jeff Bennetzen*

S6 ONCOLOGY

Tea for tumours

Green tea's potential as a treatment for cancer

The largest tea plantation in the province of Yunnan, China, is a source of pu-erh, a prized tea.

S8 MENTAL HEALTH

Drink tea and be merry

How tea might alter mood and focus

S10 CLIMATE

The changing seasons of tea

Tea's quality is affected by its growth environment

S12 BIOTECHNOLOGY

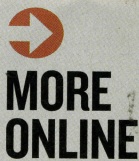

Engineering a better beverage

Innovation in breeding new tea varieties

S14 NANOTECHNOLOGY

A fresh brew

Could compounds in tea facilitate greener chemistry?
