THIS WEEK

EDITORIALS

275 DEVELOPING WORLD

Africa's elite

An initiative to showcase and support the continent's talent must be fostered

275 SOCIETY

Metropolis now

We can tackle problems in cities using lessons from exploring the Universe

276 CHEMISTRY

Practical DNA

DNA origami is set to revolutionize nanotechnology

WORLD VIEW

277 The elephant in the room we can't ignore

Colin Macilwain

If Western democracy fails, a small part of the blame will fall on scientists

RESEARCH HIGHLIGHTS

278 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Microbe link to heart attack / Syntax in bird song / CO₂ as fuel / Beetles on the water / Milky Way bulge observed

SEVEN DAYS

280 THE NEWS IN BRIEF

Famous killer whale's health declines / Researchers get access to genetic data / US call to save bees / UK scientists call to stay in EU

CAREERS

405 CAREER PLANNING

Question time

Devising an individual development plan sounds like hard work, but it can open up unimagined possibilities

406 TRADE TALK

Funding fixer

Writing grant proposals and helping investigators to form collaborations keeps cardiovascular biologist Christina Papke in touch with biomedicine

NEWS IN FOCUS

283 NEUROSCIENCE

Brain stimulation tested in athletes

284 ARTIFICIAL INTELLIGENCE

Broader applications for Google's Go-playing algorithm

286 HUMAN EVOLUTION

Ancient DNA pushes back dawn of Neanderthals

287 MATHEMATICS

Prize awarded for Fermat's last theorem

288 SPACE

Russia and Europe launch joint ExoMars mission

289 PLANETARY SCIENCE

NASA defers Mars quake probe

FEATURES

SPACE

Mystery-planet hunt

Astronomers seek Planet X at extremes of Solar System **PAGE 290**

294 NEUROSCIENCE

The red-hot debate about transmissible Alzheimer's

Scientists race to test controversial hypothesis that amyloid seeds could be passed from one person to another •

TECHNOLOGY

401 SYNTHETIC BIOLOGY

Living factories of the future

Living cells are being engineered to make the materials of the future

COMMENT

RESEARCH

Team with industry

Public-private partnerships improve the incentives, explains Aled Edwards

PAGE 299

BOOKS & ARTS

302 MUSEUMS

Ethics of exhibition

David Hurst Thomas

303 BOOKS IN BRIEF

304 ENTOMOLOGY

Nabokov's scientific artistry

Vladimir Lukhtanov

CORRESPONDENCE

305 Australian cutback / China's Red Lines / Peer-review guidelines / Don't rush to publish / Preserving agricultural ecosystems

FUTURES

408 Genius loci

S R Algeron

CONTENTS

17 March 2016 / Vol 531 / Issue No 7594

RESEARCH

NEW ONLINE

307 Papers published AOP this week at nature.com

NEWS & VIEWS

308 MATERIALS SCIENCE

How crystals get an edge
Control of polytype formation in semiconductor nanowires
Anna Fontcuberta i Morral
SEE ARTICLE P. 317

309 BIOMEDICINE

Visionary stem-cell therapies
Regeneration of lens tissue *in situ* and corneal tissue *in vitro*
Julie T Daniels
SEE ARTICLE P.323 & LETTER P. 376

310 GLOBAL WARMING

China's contribution to climate change
No net change in China's relative contribution to global warming
Dominick V Spracklen
SEE LETTER P. 357

312 MICROROBOTICS

Swimmers by design
A light-powered microrobot inspired by *Paramecium* protozoa
Igor S Aranson

313 VIROLOGY

The X-Files of hepatitis B
Lysogeny is associated with high host abundance
T Jake Liang
SEE LETTER P. 386

314 CORAL REEFS

Turning back time
The response of a natural reef to reduced seawater acidity
Janice M Lough
SEE LETTER P. 362

ARTICLES

317 **NANOSCALE MATERIALS** Interface dynamics and crystal phase switching in GaAs nanowires
D Jacobsson et al. SEE N&V P. 308

323 **REGENERATIVE MEDICINE** Lens regeneration using endogenous stem cells with gain of visual function
H Lin et al. SEE N&V P. 309

329 **STRUCTURAL BIOLOGY** Observing

ON THE COVER

Beating Ebola

Protective suits left to dry after an Ebola training session held by the Spanish Red Cross in Madrid in October 2014. The newly discovered small-molecule drug GS-5734, now in clinical trials (go.nature.com/PEW20i), has antiviral activity against Ebola and other filoviruses, and is capable of providing post-exposure protection against Ebola virus in 100% of infected macaques. The drug targets the viral RNA-dependent RNA polymerase. **PAGE 381**

cellulose biosynthesis and membrane translocation *in crystallo*
J L W Morgan et al.

335 **STRUCTURAL BIOLOGY** Crystal structures of the M1 and M4 muscarinic acetylcholine receptors
D M Thal et al.

LETTERS

341 **PARTICLE ASTROPHYSICS** Positron annihilation signatures associated with the outburst of the microquasar V404 Cygni
T Siegert et al.

344 **PLANETARY SCIENCE** Late Tharsis formation and implications for early Mars
S Bouley et al.

348 **NANOSCALE MATERIALS** Enhancing coherence in molecular spin qubits via atomic clock transitions
M Shiddiq et al.

352 **OPTICS AND PHOTONICS** Three-dimensional control of the helical

axis of a chiral nematic liquid crystal by light
Z-g Zheng et al.

357 **CLIMATE SCIENCES** The contribution of China's emissions to global climate forcing
B Li et al. SEE N&V P. 310

362 **BIOGEOCHEMISTRY** Reversal of ocean acidification enhances net coral reef calcification
R Albright et al. SEE N&V P. 314

366 **BIOOCEANOGRAPHY** Vast assembly of vocal marine mammals from diverse species on fish spawning ground
D Wang et al.

371 **NEUROSCIENCE** Sensory experience regulates cortical inhibition by inducing IGF1 in VIP neurons
A R Mardinly et al.

376 **REGENERATIVE MEDICINE** Co-ordinated ocular development from human iPS cells and recovery of corneal function
R Hayashi et al. SEE N&V P.309

381 **DRUG DISCOVERY** Therapeutic efficacy of the small molecule GS-5734 against Ebola virus in rhesus monkeys
T K Warren et al.

386 **VIROLOGY** Hepatitis B virus X protein identifies the Smc5/6 complex as a host restriction factor
A Decorsière et al. SEE N&V P. 313

390 **DEVELOPMENTAL BIOLOGY** Sequence-dependent but not sequence-specific piRNA adhesion traps mRNAs to the germ plasm
A Vourekas, P Alexiou, N Vrettos, M Maragkakis & Z Mourelatos

395 **STRUCTURAL BIOLOGY** Crystal structure of a substrate-engaged SecY protein-translocation channel
L Li et al.

400 **CORRIGENDUM** Domains of genome-wide gene expression dysregulation in Down's syndrome
A Letourneau et al.

400 **CORRIGENDUM** Hallmarks of pluripotency
A De Los Angeles et al.

400 **CORRIGENDUM** Failure to replicate the STAP cell phenomenon
A De Los Angeles et al.

SUSANA VERA/REUTERS

URBAN HEALTH AND WELL-BEING

natureOUTLOOK

Better cities, happier people

Turn to page 306

S49 EDITORIAL

Urban health and well-being
Richard Hodson

S50 TIMELINE

The rise of the urbanite
Years of innovation in the city

S52 MOBILITY

The urban downshift
Walkable cities could boost health

S54 FLOODING

Water potential
Ideas for coping with a changing climate

S56 GREEN SPACE

A natural high
Parks and gardens improve happiness

Urban green spaces such as Rock Creek Park in Washington DC can improve well-being (S56).

S58 STRESS

The privilege of health
Addressing health inequality

S60 PERSPECTIVE

City farming needs monitoring
Andrew Meharg discusses agriculture

S61 DISEASE

Poverty and pathogens
The contribution of poor living conditions

S64 POLICY

Urban physics
An alternative approach to city planning
