## THIS WEEK

### EDITORIALS

#### 5 GENETICS

##### Dark satanic wings

How a jumping gene helped the pepper moth don its dark disguise

#### 5 POLICY

##### Toxic control

The US law on toxic chemicals is not the only rule that needs to be rewritten

#### 6 ASTRONOMY

##### Seeing farther

Telescopes offer much more than just a view of the heavens

### WORLD VIEW

#### 7 The developing world needs basic research too

*Dyna Rochmyaningsih*  
Applied science has its place, but 'frontier research' also pays dividends

### RESEARCH HIGHLIGHTS

#### 8 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Cephalopods on the march / Dark-age galaxy / Martian interglacial / Strange brew / Prion toxicity / Rubber-tree genome

### SEVEN DAYS

#### 10 THE NEWS IN BRIEF

Barley boost for Ethiopian brewers / Contract signed for largest ground-based telescope / *Science* appoints new editor / Trump rallies in support of fossil fuels

## CAREERS

#### 141 TEAM BUILDING

##### Morale boosters

Research is not all plain sailing, but if team spirit is high, setbacks can be overcome

#### 143 TURNING POINT

##### Nanotech bridge

Arab researchers are rare in Israel, but Hossam Haick thinks science can help build links between communities

## NEWS IN FOCUS

#### 13 OCEANS

Airborne initiative seeks to map health of coral reefs

#### 14 PUBLISHING

*eLife* journal buoyed by £25-million cash injection

#### 15 SPACE

Tiny satellites gear up for launch

#### 16 NUCLEAR PHYSICS

Department of Energy advises US to stick with giant fusion project

#### 17 MATHEMATICS

200-terabyte proof smashes records — but is it maths?

#### 18 EXPLAINER

What revisions to US law mean for regulation of toxic chemicals

### FEATURES

#### 20 RESEARCH

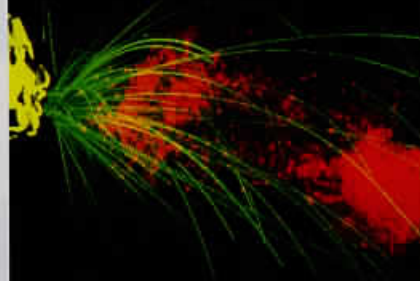

##### South Korea's Nobel dream

It will take more than money to become a world leader in basic research

### HEALTH

## Where sneezes go

High-speed video has allowed Lydia Bourouiba to track sneezes and coughs **PAGE 24**

### TOOLBOX

#### 139 ARCHIVES

##### Digital forensics in the library

Data are being lost to science at an alarming rate — here's how to keep them

## COMMENT

#### 27 PHARMACEUTICALS

##### Drug companies must adopt green chemistry

*John L. Tucker & Margaret M. Faul*  
Amgen scientists describe the company's efforts to put sustainability at the centre of its operations

#### 30 OCEAN CONSERVATION

##### The seas cannot be saved on a budget of breadcrumbs

*Fanny Douvère*  
UNESCO's marine-heritage arm can deliver, but stakeholders need to provide the financial muscle

### BOOKS & ARTS

#### 34 ASTRONOMY

##### Cosmic detectives

*Bernie Fanaroff*

#### 35 BOOKS IN BRIEF

#### 36 HISTORY

##### Peace, love and lab work

*Ann Finkbeiner*

### CORRESPONDENCE

37 CRISPR-Cas9 licensing / China's green GDP / Asian-hornet threat to bees / Circular-economy caution / Post-Chernobyl Ukraine

### OBITUARY

#### 38 Walter Kohn (1923–2016)

*Lu J. Sham*

### FUTURES

#### 146 When the cold comes

*Deborah Walker*

# CONTENTS

2 June 2016 / Vol 534 / Issue No 7605

## RESEARCH

### NEW ONLINE

- 39 Papers published AOP this week at nature.com

### NEWS & VIEWS

#### 40 PLANETARY SCIENCE

##### Pluto's polygons explained

Vigorous convection explains polygonal terrain of Pluto's Sputnik Planum  
*Andrew J Dombard & Sean O'Hara*

SEE LETTERS P.79 & P.82

#### 41 MICROBIOLOGY

##### Pumping persists

Increased efflux by bacterial TolC pumps promotes antibiotic tolerance  
*Kenn Gerdes & Szabolcs Semsey*

#### 42 STRUCTURAL BIOLOGY

##### A photo shoot of plant photosystem II

A high-resolution structure of spinach photosystem II  
*Roberta Croce & Pengqi Xu*

SEE ARTICLE P.69

#### 43 ARCHAEOLOGY

##### Neanderthals built underground

175,000-year-old circular structures built by Neanderthals  
*Marie Soressi*

SEE LETTER P.111

#### 45 GEOPHYSICS

##### Earth's core problem

The thermal conductivity of iron under conditions of Earth's outer core  
*David Dobson*

SEE LETTERS P.95 & P.99

### ARTICLES

#### 47 CANCER GENOMICS Landscape of

somatic mutations in 560 breast cancer whole-genome sequences  
*S Nik-Zainal et al.*

#### 55 CANCER PROTEOMICS Proteogenomics

connects somatic mutations to signalling in breast cancer  
*P Mertins et al.*

#### 63 STRUCTURAL BIOLOGY Activation of

NMDA receptors and the mechanism of inhibition by ifenprodil  
*N Tajima et al.*

#### 69 STRUCTURAL BIOLOGY Structure of

spinach photosystem II-LHCII supercomplex at 3.2 Å resolution  
*X Wei et al.* SEE N&V P.42

ON THE COVER

## Pluto's polygons

Sputnik Planum, a nitrogen-ice-filled basin central to Pluto's geological activity, as seen by NASA's New Horizons spacecraft. Two papers in this issue conclude that this terrain is continually resurfaced by convection, but arrive at contrasting models for the process. PAGES 40, 79 & 82

### LETTERS

#### 75 ASTROPHYSICS Regulation of black-hole accretion by a disk wind during a violent outburst of V404 Cygni

*T Muñoz-Darias et al.*

#### 79 PLANETARY SCIENCE Vigorous convection as the explanation for Pluto's polygonal terrain

*A J Trowbridge, H J Melosh, J K Steckloff & A M Freed* SEE N&V P.40

#### 82 PLANETARY SCIENCE Convection in a volatile nitrogen-ice-rich layer drives Pluto's geological vigour

*W B McKinnon et al.* SEE N&V P.40

#### 86 ULTRAFAST PHOTONICS Attosecond nonlinear polarization and light-matter energy transfer in solids

*A Sommer et al.*

#### 91 ATMOSPHERIC CHEMISTRY Oil sands operations as a large source of secondary organic aerosols

*J Liggitto et al.*

#### 95 GEOPHYSICS Experimental determination of the electrical resistivity of iron at Earth's core conditions

*K Ohta, Y Kuwayama, K Hirose, K Shimizu & Y Ohishi* SEE N&V P.45

#### 99 GEOPHYSICS Direct measurement of thermal conductivity in solid iron at planetary core conditions

*Z Konôpková, R S McWilliams, N Gómez-Pérez & A F Goncharov* SEE N&V P.45

#### 102 EVOLUTIONARY GENETICS The industrial melanism mutation in British peppered moths is a transposable element

*A Evan't Hof et al.*

#### 106 EVOLUTIONARY GENETICS The gene cortex controls mimicry and crypsis in butterflies and moths

*N J Nadeau et al.*

#### 111 ARCHAEOLOGY Early Neanderthal constructions deep in Bruniquel Cave in southwestern France

*J Jaubert et al.* SEE N&V P.43

#### 115 NEUROSCIENCE A shared neural ensemble links distinct contextual memories encoded close in time

*D J Cai et al.*

#### 119 HEART DISEASE *Pitx2* promotes heart repair by activating the antioxidant response after cardiac injury

*G Tao et al.*

#### 124 PHYSIOLOGY Feedback modulation of cholesterol metabolism by the lipid-responsive non-coding RNA *LeXis*

*T Sallam et al.*

#### 129 CANCER Overcoming EGFR(T790M) and EGFR(C797S) resistance with mutant-selective allosteric inhibitors

*Y Jia et al.*

#### 133 RIBOSOMES Diverse roles of assembly factors revealed by structures of late nuclear pre-60S particles

*S Wu et al.*

#### 138 CORRIGENDUM Observation of polar vortices in oxide superlattices

*A K Yadav et al.*

#### 138 CORRIGENDUM Signalling thresholds and negative B-cell selection in acute lymphoblastic leukaemia

*Z Chen et al.*

#### 138 ERRATUM Epithelial tricellular junctions act as interphase cell shape sensors to orient mitosis

*F Bosveld et al.*

NASA/JOHNS HOPKINS UNIV APPLIED PHYSICS LAB/ SOUTHWEST RESEARCH INST. IMAGE COMPOSITION & PROCESSING BY P SCHENK & P ENGBRETTSON
