THIS WEEK

EDITORIALS

5 EPIDEMIOLOGY

The next steps on Zika

A full assessment of the threat posed by Zika virus is urgently needed

6 CLIMATE RESEARCH

Green growth

US policymakers should abandon the party line and help climate science

6 POLITICS

Better together

A British exit from the EU could spell trouble for research

WORLD VIEW

7 Make journals report clinical trials properly

Ben Goldacre

Researchers must make it clear if they change outcomes and goals

RESEARCH HIGHLIGHTS

8 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Fungi could handle Mars / Warming link to UK floods / Octopus body language / Bats versus pathogens / Listeria virulence factors / California shaking

SEVEN DAYS

10 THE NEWS IN BRIEF

Stem-cell memoirs sell fast / Abbott buys Alere / Europe clamps down on car-makers / More questions over artificial trachea transplants

CAREERS

119 COUNSELLING

Knowledge is power

The wise researcher builds a network of mentors and learns from them all

121 COLUMN

The question I hate the most

Eleftherios P Diamandis

When are you planning to retire? Don't ask!

121 TRADE TALK

Neuro connector

Neuroscientist Dorothy Jones-Davis is making connections in the world of Alzheimer's disease research

NEWS IN FOCUS

13 ZIKA VIRUS

Researchers question link between Zika infection and birth defects

15 POLITICS

Fears for research as UK prepares to vote on EU

16 ENVIRONMENTAL RESEARCH

Columbia University seeks private funds for climate centre

17 PSYCHOPHARMACOLOGY

Drugmakers eye fresh avenues for treating cognitive effects of depression

18 BIOTECHNOLOGY

UK gives green light to genome-editing in human embryos

18 GERMANY

Research clusters are successes of funding revamp

FEATURES

CLIMATE SCIENCE

Tropical mystery

The race to understand why Earth's dry zones are shifting polewards

PAGE 20

24 TECHNOLOGY

The soft touch

Meet the squishy, stretchy robots that can mimic organic life

COMMENT

REPRODUCIBILITY

A tragedy of errors

Publishers must make it easier to fix mistakes in the literature, say David B Allison, Andrew W Brown, Brandon J George & Kathryn A Kaiser

PAGE 27

BOOKS & ARTS

30 IMAGING

Medical modernist

Thomas Schnalke

31 BOOKS IN BRIEF

32 ARCHITECTURE

The Crick Institute unpeeled

Ewen Callaway

CORRESPONDENCE

33 Flying foxes sacrificed to fruit production / Don't patent gene-edited plants / Tibet's wildlife fenced in / Fair shares for Europe / Remember Project Mohole

TOOLBOX

117 PUBLISHING

Low-cost journals piggyback on arXiv

Fields such as astrophysics are test beds for new publishing concepts

118 Q&A

The code librarian

Alice Allen's spare-time work editing the Astrophysics Source Code Library could provide a model for other disciplines

FUTURES

124 Musings on time travel

Robert Reed

RESEARCH

NEW ONLINE

- 35 Papers published this week at nature.com

NEWS & VIEWS

- 36 **ELECTROCHEMISTRY**
Photocatalysts in close-up
A nanoscale study of water-splitting catalysts
Johan Holkens & Maarten B J Roelfaers
[SEE LETTER P.77](#)
- 37 **AGEING**
A stretch in time
A single organismal state determines the risk of death in nematodes
Zachary Pincus
[SEE LETTER P.103](#)
- 38 **PARKINSON'S DISEASE**
Disorder in the court
Evidence that α -synuclein is a disordered monomer in living cells
T Reid Alderson & Ad Bax
[SEE ARTICLE P.45](#)
- 41 **OPTICAL PHYSICS**
Ultrashort light pulses shake atoms
Optical attosecond pulses probe how atomic electrons respond to light
Kyung Taec Kim
[SEE LETTER P.66](#)
- 42 **CANCER**
Fibroblasts for all seasons
Different fibroblast subpopulations can promote or suppress cancer
Erwin F Wagner
- 43 **PHYLOGENY**
A home for *Xenoturbella*
New species confirm worms' place at the base of the bilaterian radiation
Henry Gee
[SEE LETTERS P.89 & P.94](#)

ARTICLES

- 45 **STRUCTURAL BIOLOGY** Structural disorder of monomeric α -synuclein persists in mammalian cells
F-X Theillet et al. [SEE N&V P.38](#)
- 51 **VIROLOGY** Persistent HIV-1 replication maintains the tissue reservoir during therapy
R Lorenzo-Redondo et al.
- 57 **CANCER GENOMICS** Active medulloblastoma enhancers reveal

ON THE COVER

Floral patterns

Bell heather with a silver-studded blue butterfly, Shropshire, UK. Declines in flowers have been suggested as a key cause of recent declines in insect pollinators, but the idea has not been fully tested. A new assessment of total nectar supply — a key resource for pollinators — reveals a decline in England and Wales between the 1930s and 1970s [PAGE 85](#)

subgroup-specific cellular origins
C Y Lin et al.

LETTERS

- 63 **PLANETARY SCIENCE** A homogeneous nucleus for comet 67P/Churyumov-Gerasimenko from its gravity field
M Pätzold et al.
- 66 **OPTICAL PHYSICS** Optical attosecond pulses and tracking the nonlinear response of bound electrons
M Th Hassan et al. [SEE N&V P.41](#)
- 71 **BIOMEDICAL ENGINEERING** Bioresorbable silicon electronic sensors for the brain
S-K Kang et al.
- 77 **ELECTROCHEMISTRY** Sub-particle reaction and photocurrent mapping to optimize catalyst-modified photoanodes
J B Sambur et al. [SEE N&V P.36](#)
- 81 **SOLID EARTH SCIENCES** Dehydration of lawsonite could directly trigger earthquakes in subducting oceanic crust
K Okazaki & G Hirth

- 85 **RESTORATION ECOLOGY** Historical nectar assessment reveals the fall and rise of floral resources in Britain
M Baude et al.
- 89 **TAXONOMY** Xenacoelomorpha is the sister group to Nephrozoa
J T Cannon et al. [SEE N&V P.43](#)
- 94 **TAXONOMY** New deep-sea species of *Xenoturbella* and the position of Xenacoelomorpha
G W Rouse, N G Wilson, J I Carvajal & R C Vrijenhoek [SEE N&V P.43](#)
- 98 **NEUROSCIENCE** Autism-like behaviours and germline transmission of transgenic monkeys overexpressing MeCP2
Z Liu et al.
- 103 **COMPLEX NETWORKS** The temporal scaling of *Caenorhabditis elegans* ageing
N Stroustrup et al. [SEE N&V P.37](#)
- 108 **VIROLOGY** An essential receptor for adeno-associated virus infection
S Pillay et al.
- 113 **EPIGENOMICS** Genome-wide nucleosome specificity and function of chromatin remodellers in ES cells
M de Dieuleveult et al.

TAXONOMY

Keep it simple

New *Xenoturbella* species suggest the mystery worm retained a simple morphology, rather than gain it through radical simplification [PAGE 94](#)

MARK SISSON/FLPA
