THIS WEEK

EDITORIALS

153 SOCIETY

Experts must demand to be heard
Scientists must rise above politics and restate their value to society

153 POLICY

Greek science
Incoming government should not abandon its predecessor's reforms

WORLD VIEW

155 Wind-down of stem-cell institute leaves a void
Jeanne F Loring
Funds for California institute unintentionally boosted a market for potentially dangerous fakes

RESEARCH HIGHLIGHTS

156 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Waltzing away a genetic risk of obesity / Colourful crystals / Primordial bubble bath / Benefit of tailored tumour therapy / Crows cheer up when using tools

SEVEN DAYS

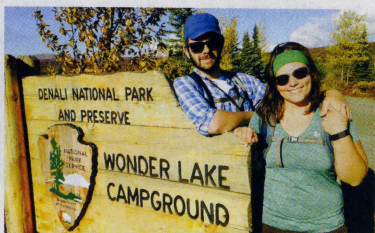

158 THE NEWS IN BRIEF

Map of Milky Way's warped disk / Missile-treaty withdrawal / Harvard's panel for Sun-blocking project / Heatwave linked to climate change

CAREERS

275 COLUMN

Two bodies, one solution
A scientific approach can help academic couples make tough career choices

NEWS IN FOCUS

161 POLITICS

Tensions between scientists and Brazil's president reach fever pitch

162 PHYSICS

Supergravity theory nets originators US\$3-million Breakthrough Prize

163 GEOLOGY

Indian researchers call for law to protect fossil sites

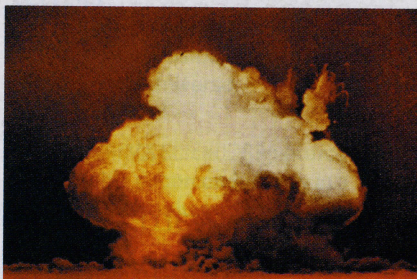

164 FUNDING

Alaska's governor slashes support for public universities

165 DISEASE RESEARCH

HIV vaccine to be tested in thousands of people

FEATURE

GEOLOGY

Humans vs Earth

The search for geological signatures to define the Anthropocene **PAGE 168**

COMMENT

PUBLISHING

Ethical quandary

Researchers need guidance on citing morally dubious work, say Graeme D. Ruxton and Tom Mulder **PAGE 171**

BOOKS & ARTS

174 ART

The Bauhaus at 100: science by design
Nicholas Fox Weber

176 ENVIRONMENTAL SCIENCE

An Arctic reckoning
Sverker Sörlin

CORRESPONDENCE

178 Track progress on Sustainable Development Goals / Denmark's gender balance / Tree plantations / A tribute to Suzanne Eaton / Happy birthday to the ultracold neutron

FUTURES

278 **Breadcrumbs for an alien**
Bo Balder

CONTENTS

8 August 2019 / Vol 572 / Issue No 7768

RESEARCH

NEW ONLINE

179 Papers published this week at nature.com

NEWS & VIEWS

180 PHYSICAL CHEMISTRY

A versatile cold-molecule collider

A way to study interactions of trapped molecules at low temperatures
Dajun Wang [SEE ARTICLE P.189](#)

181 TUMOUR BIOLOGY

Flower power as human cancer cells compete

Differences between versions of Flower protein affect cell survival
Yasuyuki Fujita [SEE LETTER P.260](#)

182 GENOMICS

Evolution of flight loss caught in the act

Genomes of flighted and flightless steamer ducks compared
Julia A Clarke

184 METABOLISM

A stress-coping strategy for yeast cells

Taking up lysine enables yeast cells to handle oxidative stress
Jens Nielson [SEE LETTER P.249](#)

185 HYDROLOGY

Groundwater resilience in sub-Saharan Africa

An analysis of aquifer replenishment
Richard W Healy [SEE LETTER P.230](#)

187 ECOLOGY

Global maps of soil nematode worms

Data estimating biodiversity could aid conservation efforts
Nico Eisenhauer & Carlos A Guerra
[SEE ARTICLE P.194](#)

ARTICLES

189 PHYSICAL CHEMISTRY

Collisions between cold molecules in a superconducting magnetic trap

Y Segev et al. [SEE N&V P.180](#)

194 ECOLOGY

Soil nematode abundance and functional group composition at a global scale

J van den Hoogen et al. [SEE N&V P.187](#)

199 STEM CELLS

A human liver cell atlas reveals heterogeneity and epithelial progenitors

N Aizarani et al.

205 BIOTECHNOLOGY

De novo design of

ON THE COVER

Drawn together

Active-matter systems have been widely explored for their ability to spontaneously form patterns and generate flows. Tyler Ross, Matt Thomson and colleagues show that light can be used to guide the behaviour of an engineered microtubule-based active-matter system, giving rise to emergent structures and properties that can be dynamically controlled. [PAGE 224](#)

bioactive protein switches

RA Langan et al.

LETTERS

211 ASTRONOMY

A dominant population of optically invisible massive galaxies in the early Universe

T Wang et al.

215 MATERIALS SCIENCE

Signatures of tunable superconductivity in a trilayer graphene moiré superlattice

G Chen et al.

220 CONDENSED-MATTER PHYSICS

Visualizing electrostatic gating effects in two-dimensional heterostructures

P V Nguyen et al.

224 MATERIALS CHEMISTRY

Controlling organization and forces in active matter through optically defined boundaries

T D Ross et al.

230 HYDROLOGY

Observed controls on

resilience of groundwater to climate variability in sub-Saharan Africa

M O Cuthbert et al. [SEE N&V P.185](#)

235 SOLID EARTH SCIENCES

Deep roots for mid-ocean-ridge volcanoes revealed by plagioclase-hosted melt inclusions

E N Bennett, F E Jenner, M-A Millet, K V Cashman & C J Lissenberg

240 EVOLUTIONARY BIOLOGY

Non-photosynthetic predators are sister to red algae

R M R Gawryluk et al.

244 PATHOGENESIS

Cholera toxin promotes pathogen acquisition of host-derived nutrients

F Rivera-Chávez & J J Mekalanos

249 METABOLISM

Lysine harvesting is an antioxidant strategy and triggers underground polyamine metabolism

V Olin-Sandoval et al. [SEE N&V P.184](#)

254 CANCER

Absence of NKG2D ligands defines leukaemia stem cells and mediates their immune evasion

A M Paczulla et al.

260 CANCER

Flower isoforms promote competitive growth in cancer

E Madan et al. [SEE N&V P.181](#)

265 BIOTECHNOLOGY

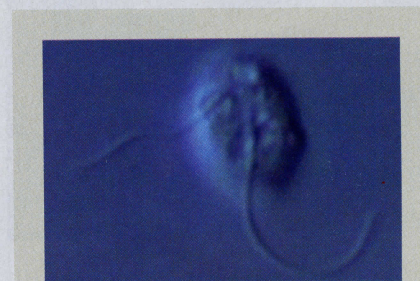

Modular and tunable biological feedback control using a de novo protein switch

A H Ng et al.

270 PLANT SCIENCES

Mechanisms of RALF peptide perception by a heterotypic receptor complex

Y Xiao et al.

EVOLUTIONARY BIOLOGY

Eating light

Mixotrophic feeding persisted in evolution of Archaeplastida. [PAGE 240](#)
