

CONTENTS

26 September 2019 / Vol 573 / Issue No 7775

THIS WEEK

EDITORIALS

463 POLICY

A stem-cell race that no one wins
Japan must tighten up its regulation of regenerative medicine

463 BIODIVERSITY

Valuing nature
UK assessment must not be rushed

464 HISTORY

The past matters
Lessons for the future from science in the past

WORLD VIEW

465 A journal club to fix science

Amy Orben
A grass-roots initiative stimulates open science from the bottom up

RESEARCH HIGHLIGHTS

466 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Marsupial oddity / Vaccination clock / Diamond record / Supercooled drizzle / Supersonic champagne / Sex tactics / Glowing DNA tags

SEVEN DAYS

468 THE NEWS IN BRIEF

US research security / Precise neutrino measurement / Canberra shifts to renewables / Fukushima ruling

TECHNOLOGY

615 MICROBIOME

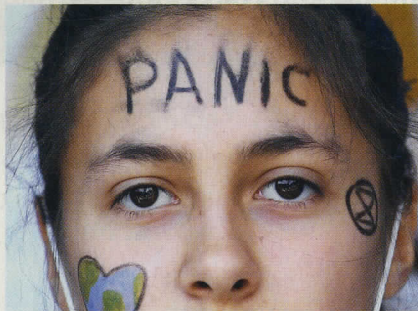

Microbial chemistry gains fresh focus
The tools that are delving into the microbiome's metabolites

CAREERS

617 COLUMN

Academia to freelance curator
How the Science Museum inspired a geneticist to switch to communication

NEWS IN FOCUS

471 SOCIETY

Why young activists are having an impact

472 ACTIVISM

Scientists join global climate strikes

473 POLAR RESEARCH

Germany's biggest research vessel to be locked in Arctic ice

474 CHINA

Efforts to stop desertification jeopardize water supplies

475 ANTHROPOLOGY

DNA portrait reveals Denisovan facial features

FEATURES

478 CONSERVATION

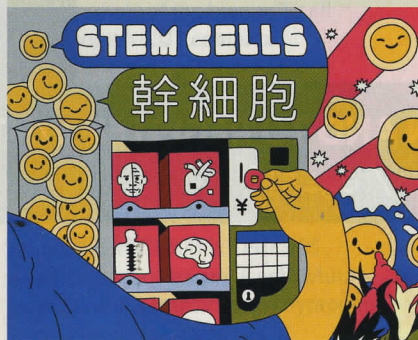

The everything mapper
An ecologist aims to chart the planet

REGENERATIVE MEDICINE

Stem cells

2 go

Japan's liberal policies on stem-cell regulation raise concerns **PAGE 482**

COMMENT

150 YEARS OF NATURE

Discovery is political

David Kaiser traces the roots of government funding for science **PAGE 487**

490 MODELLING

Make more digital twins

Fei Tao and Qinglin Qi
Virtual models need to be optimized to drive smart manufacturing

BOOKS & ARTS

492 IN RETROSPECT

The Economic Consequences of the Peace

Ann Pettifor

493 BOOKS IN BRIEF

CORRESPONDENCE

495 Plan S in Latin America / The promise of drones / Rare spring warming looms / Co-production for food systems / Ditch plastic journal wrappers

FUTURES

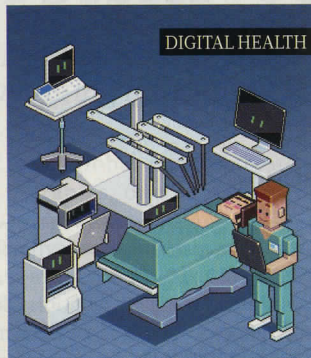

620 reCAPTCHA all over again

Aaron Moskalik

DIGITAL HEALTH

natureOUTLOOK

DIGITAL HEALTH

Transforming medicine with artificial intelligence

Turn to page 495

S97 EDITORIAL

Digital health

Richard Hodson

S98 DIAGNOSTICS

Tech support

Diagnosis with help from AI

S100 CLINICAL STUDIES

Trial by artificial intelligence

Big data and machine-learning could speed up trials

S103 EQUALITY

Mind the gap

Giving AI's benefits a wider reach

An assistant readies an autonomous robot to perform surgery (see page S110).

S106 THERAPY

A smarter way to treat

Ways to treat conditions by digital means

S110 ROBOTICS

Your robot surgeon will see you now

Robots' surgical skills are beginning to equal those of human specialists

S112 AUTOMATION

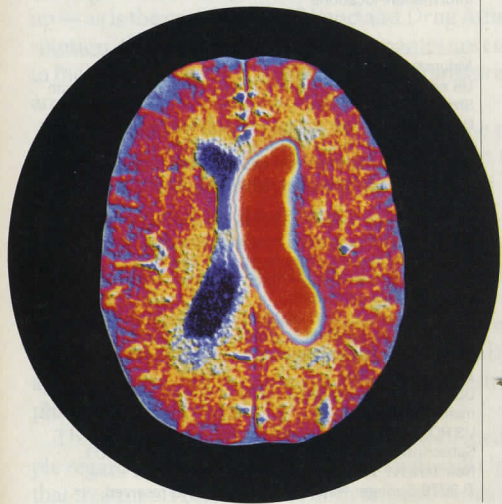

An operating system for the biology lab

Automated labs are gaining prominence

S114 DATA MANAGEMENT

Fixing a broken record

The impact of electronic health records on the work of medical staff
