

CONTENTS

28 February 2019 / Vol 566 / Issue No 7745

THIS WEEK

EDITORIALS

425 ENVIRONMENT

Wanted: climate leadership

Nations need to challenge Trump's candidate to head the World Bank

425 DATA MINING

Materials gain

Giant databases of crystal structures can open up the topological universe

WORLD VIEW

427 **Why were scientists silent over gene-edited babies?**

Natalie Kofler

We need to reflect on how science affects society — and speak up

RESEARCH HIGHLIGHTS

428 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Great white slowcoaches / Laser light shows / A virus named Medusa / Ozone mystery / Why grapes catch fire

SEVEN DAYS

430 THE NEWS IN BRIEF

Asteroid touchdown / Extinct tortoise returns / Space-force saga / Stem cells for spinal cords / Spain cuts red tape

TECHNOLOGY

563 CELL SIGNALLING

Matrix mimics shape cell studies

New techniques reveal the cross-talk between cells and their surroundings

565 CUSTOM DNA

The race for enzymatic DNA synthesis heats up

Strategy for making long stretches of nucleotides inches closer to reality

NEWS IN FOCUS

433 BIOTECHNOLOGY

US researchers look abroad to gain approval for gene-edited animals

434 SPACE EXPLORATION

Israel has launched the first privately funded Moon craft

436 GENETICS

DNA with double the bases acts like the natural variety

437 EPIDEMIOLOGY

CRISPR tools get new role in disease diagnosis

438 PHYSICS

Japan's observatory is gearing up to spot neutrinos from distant supernovae

FEATURES

GERMLINE EDITING

CRISPR babies

Four pressing questions on what's next for gene-edited humans **PAGE 440**

444 PALAEOGENETICS

Ghosts in the cave

How Denisovans are helping to rewrite our understanding of human evolution

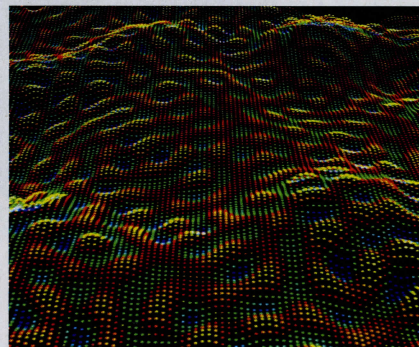

CAREERS

567 GENDER EQUITY

Ways to boot out bias

Six male scientists reveal how they are supporting their female colleagues

COMMENT

447 TOPOLOGICAL PHYSICS

Beware plausible predictions of fantasy materials

Alex Zunger

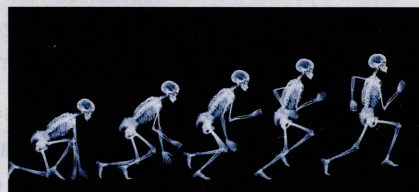

Physicists must consider stability when designing topological materials

BOOKS & ARTS

450 NUCLEAR ENERGY

Chernobyl: ruin, redux

Sonja Schmid

452 EVOLUTION

The skeleton articulated

Jan Zalasiewicz

453 NEUROSCIENCE

Bad science and the unisex brain

Lise Eliot

CORRESPONDENCE

455 An Islamic perspective on gene-edited humans / CRISPR in Mexico / Anti-racism manifesto in Italy / Map soil pollution more quickly / Cut Tibet's local emissions

FUTURES

572 **The tentacle and you**

John Wiswell

CONTENTS

28 February 2019 / Vol 566 / Issue No 7745

RESEARCH

NEW ONLINE

457 Papers published this week at nature.com

NEWS & VIEWS

458 OPTICAL PHYSICS

Colour from colourless droplets

Scattered light produces coloured haloes

Kenneth Chau [SEE LETTER P.523](#)

459 MEDICAL RESEARCH

Sticking together helps cancer to spread

Neutrophils can cluster with tumour cells and aid metastasis

Mikala Egeblad & Karin E de Visser

[SEE LETTER P.553](#)

460 QUANTUM PHYSICS

New ways to encode and use quantum bits

Promising methods for encoding and manipulating quantum information

Alessandro Ferraro

[SEE LETTERS P.509 & P.513](#)

462 CARDIOVASCULAR BIOLOGY

Fresh twist in a biochemical whodunnit

A re-evaluation of a factor involved in vasodilation

David A Kass [SEE LETTER P.548](#)

464 MATERIALS CHEMISTRY

Machines learn chemical intuition

Optimization of the synthesis of metal-organic frameworks

Seth Cohen

465 MEDICAL RESEARCH

Multiple sclerosis enters a grey area

Protein found that immune cells target in the brain's grey matter

Jenna L Pappalardo & David A Hafler

[SEE ARTICLE P.503](#)

REVIEW

467 **INFECTIOUS DISEASES** Taking connected mobile-health diagnostics of infectious diseases to the field

C S Wood et al.

ARTICLES

475 **CONDENSED-MATTER PHYSICS** Catalogue of topological electronic materials

T Zhang et al.

480 **CONDENSED-MATTER PHYSICS** A complete catalogue of high-quality topological

The vibrant colours on butterfly wings or peacock feathers are examples of structural coloration, which occurs when micro- or nanoscale-structured surfaces interfere with visible light. Lauren Zarzar and colleagues reveal a previously unrecognized mechanism for generating structural iridescent colour from droplets of colourless liquid. [PAGES 458 & 523](#)

materials

M G Vergniory et al.

486 CONDENSED-MATTER PHYSICS

Comprehensive search for topological materials using symmetry indicators

F Tang, H C Po, A Vishwanath & X Wan

490 DEVELOPMENTAL BIOLOGY

A single-cell molecular map of mouse gastrulation and early organogenesis

B Pijuan-Sala et al.

496 DEVELOPMENTAL BIOLOGY

The single-cell transcriptional landscape of mammalian organogenesis

J Cao et al.

503 MEDICAL RESEARCH

β -Synuclein-reactive T cells induce autoimmune CNS grey matter degeneration

D Lodygin et al. [SEE N&V P.465](#)

LETTERS

509 **QUANTUM PHYSICS** Entanglement of bosonic modes through an engineered exchange interaction

Y Y Gao et al. [SEE N&V P.460](#)

513 **QUANTUM PHYSICS** Encoding a qubit in a trapped-ion mechanical oscillator

C Flühmann et al. [SEE N&V P.460](#)

518 **CONDENSED-MATTER PHYSICS** A weak topological insulator state in quasi-one-dimensional bismuth iodide

R Noguchi et al.

523 **OPTICAL PHYSICS** Colouration by total internal reflection and interference at microscale concave interfaces

A E Goodling et al. [SEE N&V P.458](#)

528 **PALAEONTOLOGY** Rolling of the jaw is essential for mammalian chewing and tribosphenic molar function

B-A S Bhullar et al.

533 **NEUROSCIENCE** Recalibration of path integration in hippocampal place cells

R P Jayakumar et al.

538 **NEUROLOGICAL DISORDERS** Dynamics of oligodendrocyte generation in multiple sclerosis

M S Y Yeung et al.

543 **NEUROLOGICAL DISORDERS** Altered human oligodendrocyte heterogeneity in multiple sclerosis

S Jäkel et al.

548 **CARDIOVASCULAR BIOLOGY** Singlet molecular oxygen regulates vascular tone and blood pressure in inflammation

C P Stanley et al. [SEE N&V P.462](#)

553 **MEDICAL RESEARCH** Neutrophils escort circulating tumour cells to enable cell cycle progression

B M Szczerba et al. [SEE N&V P.459](#)

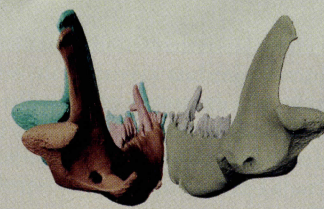

558 **MOLECULAR BIOLOGY** Multiplex chromatin interactions with single-molecule precision

M Zheng et al.

PALAEONTOLOGY

Chews wisely

Evolution of jaw roll was central to the rise of mammals. [PAGE 528](#)
