

CHINESE JOURNAL OF MECHANICAL ENGINEERING

Vol. 26, No. 2, 2013

Contents

- 217 **Configurable Product Design Considering the Transition of Multi-hierarchical Models**
REN Bin, QIU Lemiao, ZHANG Shuyou, TAN Jianrong, and CHENG Jin
- 225 **Motion/Posture Modeling and Simulation Verification of Physically Handicapped in Manufacturing System Design**
FU Yan, LI Shiqi, and CHEN Gwen-guo
- 232 **Metamorphic Manipulating Mechanism Design for MCCB Using Index Reduced Iteration**
XU Jinghua, ZHANG Shuyou, ZHAO Zhen, and LIN Xiaoxia
- 242 **Function Combined Method for Design Innovation of Children's Bike**
WU Xiaoli, QIU Tingting, and CHEN Huijuan
- 248 **High Efficient Methods of Content-based 3D Model Retrieval**
WU Yuanhao, TIAN Ling, and LI Chenggang
- 257 **Applicability and Generality of the Modified Grübler-Kutzbach Criterion**
LI Yanwen, WANG Lumin, LIU Jingfang, and HUANG Zhen
- 264 **Innovative Group-Decoupling Design of a Segment Erector Based on G_r Set Theory**
GUO Wentao, GUO Weizhong, GAO Feng, and MO Pinxi
- 275 **General Order Principle for Multi-Bennett Linkages**
LIU Jingfang, YU Yueqing, HUANG Zhen, and HUANG Xiao'ou
- 282 **Computational Path Planner for Product Assembly in Complex Environments**
SHANG Wei, LIU Jianhua, NING Ruxin, and LIU Mi
- 293 **Supply Coordination Based on Bonus Policy in Assembly under Uncertain Delivery Time**
LI Guo, LIU Mengqi, WANG Zhaohua, and PENG Bingzong
- 304 **Multidisciplinary Design Optimization of Vehicle Instrument Panel Based on Multi-objective Genetic Algorithm**
WANG Ping and WU Guangqiang
- 313 **Dual Extended Kalman Filter for Combined Estimation of Vehicle State and Road Friction**
ZONG Changfu, HU Dan, and ZHENG Hongyu
- 325 **Investigation on the Radial Micro-motion about Piston of Axial Piston Pump**
XU Bing, ZHANG Junhui, YANG Huayong, and ZHANG Bin
- 334 **Sewerage Force Adjustment Technology for Energy Conservation in Vacuum Sanitation Systems**
GUO Zhonghua, LI Xiaoning, and KAGAWA Toshiharu
- 341 **Simulation Research on the Effect of Cooled EGR, Supercharging and Compression Ratio on Downsized SI Engine Knock**
SHU Gequn, PAN Jiaying, WEI Haiqiao, and SHI Ning

- 351 **Analysis of Wear Mechanism and Influence Factors of Drum Segment of Hot Rolling Coiler**
ZHANG Jian, PENG Yan, LIU Hongmin, and LIU Yunfei
- 356 **Macroscopic Elastic Constants of Pure Metal Based on the Interactions between Microscopic Particles**
LU Ming, NIU Yongsheng, and FAN Rui
- 365 **Effect of Optimum Plastic Depth on Stresses and Load-bearing Capacity of Autofrettaged Cylinder**
ZHU Ruilin and ZHU Guolin
- 371 **Self-heating Probe Instrument and Method for Measuring High Temperature Melting Volume Change Rate of Material**
WANG Junwei, WANG Zhiping, LU Yang, and CHENG Bo
- 377 **New Iron-based SiC Spherical Composite Magnetic Abrasive for Magnetic Abrasive Finishing**
ZHANG Guixiang, ZHAO Yugang, ZHAO Dongbiao, ZUO Dunwen, and YIN Fengshi
- 384 **Effect of Electrical Current on the Tribological Behavior of the Cu-WS₂-G Composites in Air and Vacuum**
QIAN Gang, FENG Yi, LI Bin, HUANG Shiyin, LIU Hongjuan, and DING Kewang
- 393 **Sawing Performance Comparison of Brazed and Sintered Diamond Wires**
HUANG Guoqin and XU Xipeng
- 400 **Three-Steps-Meshing Based Multiple Crack Identification for Structures and Its Experimental Studies**
LI Bing, CHEN Xuefeng, and HE Zhengjia
- 406 **Accurate Evaluation of Free-form Surface Profile Error Based on Quasi Particle Swarm Optimization Algorithm and Surface Subdivision**
WEN Xiulan, ZHAO Yibing, WANG Dongxia, ZHU Xiaochun, and XUE Xiaoqiang
- 414 **Scale Effects on Propeller Cavitating Hydrodynamic and Hydroacoustic Performances with Non-uniform Inflow**
YANG Qiongfang, WANG Yongsheng, and ZHANG Zhihong
- A1 **Contents of Journal of Mechanical Engineering, Vol. 49, Nos. 1-3, 2013**
