

CHINESE JOURNAL OF MECHANICAL ENGINEERING

Vol. 24, No. 3, 2011

Contents

- 333 **Experimental Investigation of Capacity Control Scheme on System Performance for a Machine Tool Cooler**
WANG Fujen, CHANG Tongbou, KAO Jianwei, and LEE Haochung
- 340 **Receptance Coupling for Tool Point Dynamics Prediction on Machine Tools**
ZHANG Jun, SCHMITZ Tony, ZHAO Wanhua, and LU Bingheng
- 346 **Estimation of Fine Dust Particles Distribution in Machining Workshop Based on COWZ Model**
REN Fan and LIU Fei
- 355 **Combinative Algorithms for the Multidisciplinary Collaborative Simulation of Complex Mechatronic Products Based on Major Step and Convergent Integration Step**
LIANG Silü, ZHANG Heming, and WANG Hongwei
- 364 **Method for Functional Design of Axiomatic Design Based on Connections**
DENG Jianxin and SHAO Ming
- 372 **Life Prediction Based on Transient Dynamics Analysis of Van Semi-trailer with Air Suspension System**
LI Liang, SONG Jian, HE Lin, ZHANG Mengjun, and LI Hongzhi
- 380 **Stability Analysis on Rotor Systems Supported by Self-acting Tilting-pad Gas Bearings with Frequency Effects**
YANG Lihua, QI Shemiao, GENG Haipeng, and YU Lie
- 386 **Pressure Control of a Large-scale Hydraulic Power Unit Using π Bridge Network**
FENG Bin, GONG Guofang, and YANG Huayong
- 392 **Effects of Comprehensive Eccentricity of Involute Cam on Gear Profile Deviations**
WANG Liding, LING Siying, MA Yong, WANG Xiaodong, and LOU Zhifeng
- 399 **Homing Strategy for a 4RRR Parallel Kinematic Machine**
WANG Liping, LIU Dawei, and LI Tiemin
- 406 **Separation of Comprehensive Geometrical Errors of a 3-DOF Parallel Manipulator Based on Jacobian Matrix and Its Sensitivity Analysis with Monte-Carlo Method**
SUN Tao, SONG Yimin, LI Yonggang, and XU Liang
- 414 **Target Tracking Algorithm Using Finite-time Convergence Smooth Second-order Sliding Mode Controller for Mobile Robots**
GE Lianzheng, ZHAO Lijun, and GAO Tong
- 420 **Control System Design for an Unmanned Helicopter to Track a Ground Target**
XIN Zhekui and FANG Yongchun

- 428 **Reliability Evaluation of QFN Devices Soldered Joints with Creep Model**
JI Feng, XUE Songbai, ZHANG Liang, GAO Lili, SHENG Zhong, and DAI Wei
- 433 **Weldability of Copper-bearing Aging Steel**
LIU Wenyan, LIU Jibin, WANG Lai, MU Wenguang, and HU Yinhong
- 439 **Numerical Calculation and Experimental Research on Residual Stresses
in Precipitation-hardening Layer of NAK80 Steel for Shot Peening**
MIAO Hong, ZUO Dunwen, WANG Min, ZHANG Ruihong, and WANG Hongfeng
- 446 **Simulation of Static Recrystallization Behavior of 58SiMn Steel**
ZHANG Jin, ZHANG Yecheng, and HUANG Shaodong
- 452 **Thickening and Rheological Properties of Crystalline Polyester Used
in Low Pressure Sheet Molding Compounds**
LI Jian, HUANG Zhixiong, and ZHANG Kai
- 460 **Heat Transfer during the Solidification of Hot Dip Aluminizing Coating**
XIAO Gang, SHANGGUAN Qi, LU Yuheng, HUANG Caimin, and ZENG Jianmin
- 466 **Fault Diagnosis Method Based on System-phenomenon-fault Tree**
CHEN Guorong, YAN Ping, YI Runzhong, and LIU Fei
- 474 **Turbopump Condition Monitoring Using Incremental Clustering
and One-class Support Vector Machine**
HU Lei, HU Niaoqing, QIN Guojun, and GU Fengshou
- 480 **Structural Damage Detection Method Based on Decomposition
of the Operating Deflection Shapes**
ZANG Chaoping
- 487 **Temperature Dependence of Ultrasonic Longitudinal Guided Wave Propagation
in Long Range Steel Strands**
LIU Zenghua, ZHAO Jichen, WU Bin, and HE Cunfu
- 495 **Novel Resonant Accelerometer with Micro Leverage Fabricated by MEMS Technology**
HE Gaofa, TANG Yike, ZHOU Chuande, HE Xiaoping, and WU Ying
- 501 **Approximate Solutions of Primary Resonance for Forced Duffing Equation
by Means of the Homotopy Analysis Method**
YUAN Peixin and LI Yongqiang
- 507 **Solution Domain Boundary Analysis Method and Its Application in Parameter Spaces
of Nonlinear Gear System**
LIU Haixia, WANG Sanmin, GUO Jiashun, and ZHENG Yuqi
- 514 **Forthcoming IFToMM Sponsored Events**
- A1 Contents and Abstracts of Journal of Mechanical Engineering, Vol. 47, No. 7-10, 2011
