

# CHINESE JOURNAL OF MECHANICAL ENGINEERING

Vol. 25, No. 5, 2012

## Contents

- 853 **Metadynamic Recrystallization of the As-cast 42CrMo Steel after Normalizing and Tempering during Hot Compression**  
QI Huiping and LI Yongtang
- 860 **Investigation of FE Model Size Definition for Surface Coating Application**  
CHEN Yanhong, ZHUANG Weimin, WANG Shiwen, LIN Jianguo, BALINT Daniel, and SHAN Debin
- 868 **Dynamic Characteristics Analysis and Vibration Experiment of Upper-time of Flight Counter (U-ToFC)**  
WU Qiong, ZHANG Yidu, and SONG Sunguang
- 875 **Monte Carlo Method for the Uncertainty Evaluation of Spatial Straightness Error Based on New Generation Geometrical Product Specification**  
WEN Xiulan, XU Youxiong, LI Hongsheng, WANG Fenglin, and SHENG Danghong
- 882 **Application of Simple Adaptive Control to Water Hydraulic Servo Cylinder System**  
ITO Kazuhisa, YAMADA Tsuyoshi, IKEO Shigeru, and TAKAHASHI Koji
- 889 **Flow Characteristics of Expansion Energy Used Pneumatic Booster**  
SHI Yan, CAI Maolin, XU Weiqing, and LÜ Jie
- 897 **Excavator Energy-saving Efficiency Based on Diesel Engine Cylinder Deactivation Technology**  
YANG Jing, QUAN Long, and YANG Yang
- 905 **Numerical Simulation of Turbulent Flow of Hydraulic Oil through 90° Circular-sectional Bend**  
WANG Liwei, GAO Dianrong, and ZHANG Yigong
- 911 **Evaluation of Subgrid-scale Models in Large-eddy Simulations of Turbulent Flow in a Centrifugal Pump Impeller**  
YANG Zhengjun, WANG Fujun, and ZHOU Peijian
- 919 **New Bulb Turbine with Counter-rotating Tandem-runner**  
HAN Fengqin, YANG Lijing, YAN Shijie, and KUBOAT Takashi
- 926 **Application of Computational Fluid Dynamics and Fluid Structure Interaction Techniques for Calculating the 3D Transient Flow of Journal Bearings Coupled with Rotor Systems**  
LI Qiang, YU Guichang, LIU Shulian, and ZHENG Shuiying
- 933 **Performance Investigation of Capillary Tubes for Machine Tool Coolers Retrofitted with HFC-407C Refrigerant**  
WANG Fujen, CHANG Tongbou, CHIANG Weiming, and LEE Haochung
- 940 **Response Sensitivity Analysis of the Dynamic Milling Process Based on the Numerical Integration Method**  
DING Ye, ZHU Limin, ZHANG Xiaojian, and DING Han
- 947 **New Mathematical Method for the Determination of Cutter Runout Parameters in Flat-end Milling**  
GUO Qiang, SUN Yuwen, GUO Dongming, and ZHANG Chuantai

- 953 **Numerical Robust Stability Estimation in Milling Process**  
ZHANG Xiaoming, ZHU Limin, DING Han, and XIONG Youlun
- 960 **Anisotropic Force Ellipsoid Based Multi-axis Motion Optimization of Machine Tools**  
PENG Fangyu, YAN Rong, CHEN Wei, YANG Jianzhong, and LI Bin
- 968 **Analysis of Mixed Model in Gear Transmission Based on ADAMS**  
LI Xiufeng and WANG Yabin
- 974 **RFID Based e-quality Tracking in Service-oriented Manufacturing Execution System**  
FU Yingbin and JIANG Pingyu
- 982 **Cooperative Optimization of Reconfigurable Machine Tool Configurations  
and Production Process Plan**  
XIE Nan, LI Aiping, and XUE Wei
- 990 **Discrete Artificial Bee Colony Algorithm for Lot-streaming Flowshop with Total  
Flowtime Minimization**  
SANG Hongyan, GAO Liang, and PAN Quanke
- 1 001 **Establishment Method of a Mixture Model and Its Practical Application for Transmission  
Gears in an Engineering Vehicle**  
WANG Jixin, WANG Zhenyu, YU Xiangjun, YAO Mingyao, YAO Zongwei, and ZHANG Erping
- 1 011 **Asymptotic Analysis Soot Model and Experiment for a Directed Injection Engine**  
LIU Yongfeng, PEI Pucheng, XIONG Qinghui, and LU Yong
- 1 016 **Simulation on a Car Interior Aerodynamic Noise Control Based on Statistical Energy Analysis**  
CHEN Xin, WANG Dengfeng, and MA Zhengdong
- 1 022 **Variable Tension Control for Discontinuous Tape Winding of Composites Based  
on Constant Extension Ratio**  
SHI Yaoyao, YAN Long, and HE Xiaodong
- 1 029 **Modeling and Free Vibration Behavior of Rotating Composite Thin-walled  
Closed-section Beams with SMA Fibers**  
REN Yongsheng, YANG Shulian, and DU Xianghong
- 1 044 **Influence of Weave Structures on the Tribological Properties of Hybrid  
Kevlar/PTFE Fabric Composites**  
GU Dapeng, YANG Yulin, QI Xiaowen, DENG Wei, and SHI Lei
- 1 052 **Development of Atmosphere-controlled Tribometer and Fail-safe Analysis**  
DUAN Haitao, PEI Zhaohui, WU Yong, TU Jiesong, and LI Jian
- 1 060 **Dynamics and Wheel's Slip Ratio of a Wheel-legged Robot in Wheeled  
Motion Considering the Change of Height**  
DING Xilun, LI Kejia, and XU Kun
- 1 068 **Learning Gait of Quadruped Robot without Prior Knowledge of the Environment**  
XU Tao and CHEN Qijun
- A1 **Contents of Journal of Mechanical Engineering, Vol. 48, Nos. 11-13, 2012**
