CHINESE JOURNAL OF MECHANICAL ENGINEERING

Vol. 28, No. 5, 2015

Contents

869 **Over-constraint and a Unified Mobility Method for General Spatial Mechanisms Part 1: Essential Principle**
ZENG Daxing, LU Wenjuan, and HUANG Zhen

878 **Structure Design of Lower Limb Exoskeletons for Gait Training**
LI Jianfeng, ZHANG Ziqiang, TAO Chunjing, and JI Run

888 **Driving Torque Reduction in Linkage Mechanisms Using Joint Compliance for Robot Head**
ZHONG Chunhao and YANG Xiaojun

896 **Experimental Study on Molecular Arrangement of Nanoscale Lubricant Films—A Review**
ZHANG Shaohua and LIU Yuhong

904 **Improving Tribological Performance of Gray Cast Iron by Laser Peening in Dynamic Strain Aging Temperature Regime**
FENG Xu, ZHOU Jianzhong, MEI Yufen, HUANG Shu, SHENG Jie, and ZHU Weili

911 **Determination of Elastoplastic Mechanical Properties of the Weld and Heat Affected Zone Metals in Tailor-Welded Blanks by Nanoindentation Test**
MA Xiangdong, GUAN Yingping, and YANG Liu

919 **Shakedown Criterion Employing Actual Residual Stress Field and Its Application in Numerical Shakedown Analysis**
ZOU Zongyuan, GUO Baofeng, LI Yinxiao, JIN Miao, and ZHAO Shiyan

928 **Prediction of Vibration Characteristics in Beam Structure Using Sub-Scale Modeling with Experimental Validation**
ZAI Behzad Ahmed, SAMI Saad, KHAN M Amir, AHMAD Furqan, and PARK Myung Kyun

935 **Novel Evaluation Method of Vehicle Suspension Performance Based on Concept of Wheel Turn Center**
WANG Bo, GUAN Hsin, LU Pingping, and ZHAN Jun

945 **Hierarchical Control of Ride Height System for Electronically Controlled Air Suspension Based on Variable Structure and Fuzzy Control Theory**
XU Xing, ZHOU Kongkang, ZOU Nannan, JIANG Hong, and CUI Xiaoli

954 **Effects of Driving Mode on the Performance of Multiple-Chamber Piezoelectric Pumps with Multiple Actuators**
ZHANG Zhonghua, KAN Junwu, WANG Shuyun, WANG Hongyun, MA Jijie, and JIANG Yonghua

964 **Effects of System Pressure and Heat Flux on Bubble Nucleation and Growth**
QIU Chao and ZHANG Huichen

971 **Constant Speed Control of Four-stroke Micro Internal Combustion Swing Engine**
GAO Dedong, LEI Yong, ZHU Honghai, and NI Jun

983 **Abnormality Degree Detection Method Using Negative Potential Field Group Detectors**
ZHANG Hongli, LIU Shulin, LI Dong, SHI Kunju, WANG Bo, and CUI Jiqiang

994 **Multiple Measurement Models of Articulated Arm Coordinate Measuring Machines**
ZHENG Dateng, XIAO Zhongyue, and XIA Xiang

999 **Nonlinear Mathematical Modeling and Sensitivity Analysis of Hydraulic Drive Unit**
KONG Xiangdong, YU Bin, QUAN Lingxiao, BA Kaixian, and WU Liujie

1012 **Impact of Typical Steady-state Conditions and Transient Conditions on Flow Ripple and Its Test Accuracy for Axial Piston Pump**
XU Bing, HU Min, and ZHANG Junhui

1023 **Analytical and Experimental Study on Complex Compressed Air Pipe Network**
GAI Yushou, CAI Maolin, and SHI Yan

1030 **Numerical Simulation and Experimental Study of Heat-fluid-solid Coupling of Double Flapper-nozzle Servo Valve**
ZHAO Jianhua, ZHOU Songlin, LU Xianghui, and GAO Dianrong

1039 **Digitalized Accurate Modeling of SPCB with Multi-spiral Surface Based on CPC Algorithm**
HUANG Yanhua and GU Lizhi

1048 **Energy-efficient Approach to Minimizing the Energy Consumption in An Extended Job-shop Scheduling Problem**
TANG Dunbing and DAI Min

1056 **Geometric Deviation Modeling by Kinematic Matrix Based on Lagrangian Coordinate**
LIU Weidong, HU Yueming, LIU Yu, and DAI Wanyi

1067 **Effective Hybrid Teaching-learning-based Optimization Algorithm for Balancing Two-sided Assembly Lines with Multiple Constraints**
TANG Qiuhua, LI Zixiang, ZHANG Liping, FLOUDAS C A, and CAO Xiaojun

1080 **Assembly Auxiliary System for Narrow Cabins of Spacecraft**
LIU Yi, LI Shiqi, and WANG Junfeng
