How the cover gets made

"The cover story's about how Taylor Swift is essentially the entire music industry right now."

"Great, when can we shoot her?"

"Um..."

"It saddens me that Businessweek doesn't have the clout it once did with global pop sensations. In any case, there's plenty of great photos of her."

That's nice. But can we make more of a statement? She really is the biggest musician in the world right now...."

She had five songs on the Billboard Hot 100 ..."

...and sold more albums this year than Beyoncé."

OK, maybe a little less big."
