

# The Beginning

## by Jim Aley

The high school loner who figured out what the world wanted from technology. **Page 20**

# The Wilderness

## by Peter Burrows

Cast out from Apple, Jobs tried—and failed—to make a different kind of computer. **Page 28**

# The Return

## by Brad Stone

In his third act, Jobs led Apple on a run of success unprecedented in corporate history. **Page 36**

### — Stories About Steve

Friends, colleagues, and competitors talk about the man they knew. **Page 44**

# The Products

## by Sean Wilsey

How Apple stokes desire, and what the Apple experience says about the modern world. **Page 48**

### — Timeline

From the Apple I to the iPad, a history of elegant design. **Page 54**

### — Glossary

A lexicon of the words and concepts Apple has spawned. **Page 62**
