## Contents

### Editorial

Assessing and mitigating overheating in buildings

*A Mylona*

385

### Articles

A London residential retrofit case study: Evaluating passive mitigation methods of reducing risk to overheating through the use of solar shading combined with night-time ventilation

*Z De Grussa, D Andrews, G Lowry, EJ Newton, K Yiakoumetti, A Chalk and D Bush*

389

Indoor overheating and mitigation of converted lofts in London, UK

*X Li, J Taylor and P Symonds*

409

Summer thermal comfort and overheating in the elderly

*C Hughes and S Natarajan*

426

Overheating risk in Passivhaus dwellings

*R Mitchell and S Natarajan*

446

Investigating the impacts of a changing climate on the risk of overheating and energy performance for a UK retirement village adapted to the nZEB standards

*R Salem, A Bahadori-Jahromi and A Mylona*

470

The summer indoor temperatures of the English housing stock: Exploring the influence of dwelling and household characteristics

*G Petrou, P Symonds, A Mavrogianni, A Mylona and M Davies*

492

Predictions of summertime overheating: Comparison of dynamic thermal models and measurements in synthetically occupied test houses

*BM Roberts, D Allinson, S Diamond, B Abel, CD Bhaumik, N Khatami and KJ Lomas*
