Contents

Articles

- Displacing air conditioning in Kingdom of Saudi Arabia: An evaluation of 'fabric first' design integrated with hybrid night radiant and ground pipe cooling systems
J Hijazi and S Howieson 377
- User satisfaction and energy use behavior in offices in Qatar
M Indraganti, D Boussaa, S Assadi and E Mostavi 391
- Dynamic modeling, adaptive control and energy performance simulation of a hybrid hydronic space heating system
Y Ma and M Zaheeruddin 406
- Modeling air leakage in buildings caused by the cyclic variation of the atmospheric pressure
M Patrascu, T Baracu, V Badescu, M-V Birsan, C Teodosiu, M Degeratu, ER Avram, M Udrea, L Calancea and C Mesteru 430
- Experimental investigation of carbon dioxide cross-contamination in sorption energy recovery wheel in ventilation system
M Kassai 463
- Sodium acetate-urea composite phase change material used in building envelopes for thermal insulation
Y Zhang, X Wang, Z Wei, Y Zhang and Y Feng 475
- Technical Note**
A framework for building-related carbon coefficients and primary energy factors for networked electricity supplies
R Hitchin 492
