

Building Services Engineering Research & Technology

Contents

Editorial

- Stretching the bounds of knowledge and understanding for effective built environments 261
T Dwyer

Special Issue Articles

- Assessing noise with provisions for ventilation and overheating in dwellings 263
J Harvie-Clark, A Chilton, N Conlan and D Trew
- The relationship between airtightness and ventilation in new UK dwellings 274
J Crawley, J Wingfield and C Elwell
- The urban heat island of London, an empirical model 290
G Levermore and J Parkinson

Special Issue Technical Notes

- A pilot study of radon levels in certified passive house buildings 296
B McCarron, X Meng and S Colclough
- Human-in-the-loop energy flexibility integration on a neighbourhood level: Small and Big Data management 305
W Zeiler and T Labeodan

Regular Articles

- Energy or carbon? Exploring the relative size of universal zero carbon and zero energy design spaces 319
A Parkin, M Herrera and DA Coley
- Normalising domestic space heating demand using post hoc models 340
R Mitchell and S Natarajan
- Comparison of mechanical vapor recompression technology for solution regeneration in heat-source tower heat pumps 360
S Ai, B Wang, X Li and W Shi

Letter to the Editor

- A landmark BSER&T paper that provided an optimum start for energy effective operation 379
G Levermore

Reviewer List
