

Building Services Engineering Research & Technology

Volume 40, Number 6, 2019

Contents

Editorial

Looking forward to UK low-carbon heating

SJ Rees

665

Articles

Assessing the interaction of air from a jet diffuser on a thermal plume in a room using two-dimensional particle image velocimetry

Y Xu, X Wang, C Huang, G Du and Y Zhang

669

Further study of linear PMSM driven ropeless lifts with consideration of imperfections by simulation

A So and WL Chan

682

Static balance duct design method and temperature dependent variable air volume systems

KH Kong and WT Chong

698

The impact of control strategies on space heating system efficiency in low-energy buildings

C Brembilla, R Renman, M Soleimani-Mohseni, R Östin and T Olofsson

714

Review

Critical review and illustrative examples of office occupant modelling formalisms

S D'Oca, HB Gunay, S Gilani and W O'Brien

732

Technical Note

Design and implementation of a test bed for building controls

S Goyal, W Wang and MR Brambley

758
