

# CONTENTS

Commenced in May 1980

Vol. 39 No. 12 Dec. 2018 (Monthly)

Novel wavelet-homotopy Galerkin technique for analysis of lid-driven cavity flow and heat transfer with non-uniform boundary conditions .....	(1691)
Qiang YU, Hang XU	
Large eddy simulation of turbulent premixed and stratified combustion using flame surface density model coupled with tabulation method .....	(1719)
Zhou YU, Hongda ZHANG, Taohong YE, Minming ZHU	
Improvement for expansion of parabolized stability equation method in boundary layer stability analysis .....	(1737)
Yufeng HAN, Jianxin LIU, Jisheng LUO	
Conservation relation of generalized growth rate in boundary layers .....	(1755)
Runjie SONG, Lei ZHAO, Zhangfeng HUANG	
Travel time prediction with viscoelastic traffic model .....	(1769)
Yongliang ZHANG, M. N. SMIRNOVA, A. I. BOGDANOVA, Zuojin ZHU, N. N. SMIRNOV	
Phase-field simulation of the coupled evolutions of grain and twin boundaries in nanotwinned polycrystals .....	(1789)
Yuanyuan DA, Yuyang LU, Yong NI	
Semi-analytic solution of Eringen's two-phase local/nonlocal model for Euler-Bernoulli beam with axial force .....	(1805)
Licheng MENG, Dajun ZOU, Huan LAI, Zili GUO, Xianzhong HE, Zhijun XIE, Cunfa GAO	
Nonlinear free vibration of reticulated shallow spherical shells taking into account transverse shear deformation .....	(1825)
Rong WANG, Guohua NIE	
Delay-dependent stability of linear multistep methods for differential systems with distributed delays .....	(1837)
Yanpei WANG, Yuhao CONG, Guangda HU	
Isotropic polynomial invariants of Hall tensor .....	(1845)
Jinjie LIU, Weiyang DING, Liqun QI, Wennan ZOU
