PAPERS

- Human Reliability*
Quantitative Evaluation of Human-Reliability Based on Fuzzy-Clonal Selection A. Wang, Y. Luó, G. Tu, and P. Liu 517
- Integrated Circuit Reliability*
Reliability Analysis of H-Tree Random Access Memories Implemented With Built in Current Sensors and Parity Codes for Multiple Bit Upset Correction C. Argyrides, R. Chipana, F. Vargas, and D. K. Pradhan 528
Using Bayesian Networks to Accurately Calculate the Reliability of Complementary Metal Oxide Semiconductor Gates W. Ibrahim and V. Beiu 538
- Life Testing and Analysis*
Lifetime Decrease of Halogen Lamps for Automotive by Duty Cycle Stress Y. Cho and J.-J. Kim 550
Accelerated Life Tests for Weibull Series Systems With Masked Data T.-H. Fan and W.-L. Wang 557
- Lifetime Data Analysis*
Goodness-of-Fit Test Based on Kullback-Leibler Information for Progressively Type-II Censored Data A. H. Rad, F. Yousefzadeh, and N. Balakrishnan 570
- Maintenance*
Optimal Replacement in the Proportional Hazards Model With Semi-Markovian Covariate Process and Continuous Monitoring X. Wu and S. M. Ryan 580
- Networks*
Approximate Zero-Variance Importance Sampling for Static Network Reliability Estimation P. L'Ecuyer, G. Rubino, S. Saggadi, and B. Tuffin 590
- Networks and Systems*
Modeling Parameters of a Load-Sharing System Through Link Functions in Sequential Order Statistics Models and Associated Inference N. Balakrishnan, E. Beutner, and U. Kamps 605
A Sequential Decomposition Method for Estimating Flow in a Multi-Commodity, Multistate Network W.-C. Yeh 612
Hardware Error Likelihood Induced by the Operation of Software B. Huang, M. Rodriguez, M. Li, J. B. Bernstein, and C. S. Smidts 622
Linear m -Consecutive k -out-of- r -From- n : F Systems G. Levitin and Y. Dai 640
Reliability Analysis of M -for- N Shared Protection Systems With General Repair-Time Distributions H. Ozaki and A. Kara 647
Reliability and Availability Analysis of a Repairable k -out-of- n : G System With R Repairmen Subject to Shut-Off Rules R. Moghaddass, M. J. Zuo, and J. Qu 658
System Reliability Optimization Considering Uncertainty: Minimization of the Coefficient of Variation for Series-Parallel Systems H. Tekiner-Mogulkoc and D. W. Coit 667
- Prognostic Health Management*
Schedulability Analysis for Hard Network Lifetime Wireless Sensor Networks With High Energy First Clustering B.-C. Cheng, H.-H. Yeh, and P.-H. Hsu 675
- Systems*
Exact Reliability of a Linear Connected- (r, s) -out-of- (m, n) : F System X. Zhao, L. Cui, W. Zhao, and F. Liu 689
