

CONTENTS

ELECTRONICS TECHNOLOGY

183 Joint TDOA and AOA location algorithm

Congfeng Liu, Jie Yang, and Fengshuai Wang

189 Generation method of GPS L1C codes based on quadratic reciprocity law

Hui Lu and Ruiyao Niu

196 Independent component analysis to physical-layer network coding over wireless fading channels

Bing Du and Xiaoming Tao

204 High-performance compensation scheme for frequency-dependent IQ imbalances in OFDM transmitters and receivers

Yan Liang, Feng Shu, Yijin Zhang, and Junhui Zhao

209 Novel robust S transform based on the clipping method

Xiumei Li and Yingtuo Ju

215 Complex field network-coded cooperation based on multi-user detection in wireless networks

Jing Wang, Xiangyang Liu, Kaikai Chi, and Xiangmo Zhao

DEFENCE ELECTRONICS TECHNOLOGY

222 Novel polarimetric SAR speckle filtering algorithm based on mean shift

Bo Pang, Shiqi Xing, Yongzhen Li, and Xuesong Wang

234 MIMO radar dwell scheduling based on novel pulse interleaving technique

Ting Cheng, Wenwen Liao, and Zishu He

SYSTEMS ENGINEERING

- 242 Bayesian estimator of human error probability based on human performance data**
Zhiqiang Sun, Erling Gong, Zhengyi Li, Yingjie Jiang and Hongwei Xie
- 250 Computational intelligence approach for uncertainty quantification using evidence theory**
Bin Suo, Yongsheng Cheng, Chao Zeng, and Jun Li

CONTROL THEORY AND APPLICATION

- 261 Optimal aeroassisted symmetric transfer between coplanar elliptical orbits**
Jun Fu, Hong Cai, and Shifeng Zhang
- 272 Adaptive augmentation of gain-scheduled controller for aerospace vehicles**
Xiyuan Huang, Qing Wang, Yali Wang, Yanze Hou, and Chaoyang Dong
- 281 Novel robust control framework for morphing aircraft**
Chunsheng Liu and Shaojie Zhang
- 288 Flight control for a flexible air-breathing hypersonic vehicle based on quasi-continuous high-order sliding mode**
Jie Wang, Qun Zong, Bailing Tian, and Helong Liu
- 296 Distributed attitude consensus of spacecraft formation flying**
Xinsheng Wang, Jingxin Wu, and Xiaoli Wang
- 303 Rapid transfer alignment for SINS of carrier craft**
Jingshuo Xu, Yongjun Wang, and Zhicai Xiao
- 309 Input-to-state stability of Euler-Maruyama method for stochastic delay control systems**
Shifang Kuang, Feiqi Deng, and Yunjian Peng

SOFTWARE ALGORITHM AND SIMULATION

- 318 Principle and key technology of generalized high precision simulation of TT&C channel**
Yang Zhou, Zhe Zheng, and Siliang Wu
- 324 Hybrid optimization algorithm based on chaos, cloud and particle swarm optimization algorithm**
Mingwei Li, Haigui Kang, Pengfei Zhou, and Weichiang Hong
- 335 Density-based trajectory outlier detection algorithm**
Zhipeng Liu, Dechang Pi, and Jinfeng Jiang
