

CONTENTS

ELECTRONICS TECHNOLOGY

- 183 **Design of good QC-LDPC codes without small girth in the p -plane**
Lingjun Kong and Yang Xiao
- 188 **Unscented extended Kalman filter for target tracking**
Changyun Liu, Penglang Shui, and Song Li
- 193 **Design of a memory polynomial predistorter for wideband envelope tracking amplifiers**
Jing Zhang, Songbai He, and Lu Gan
- 200 **Reconstruction of sampling in shift-invariant space using generalized inverse**
Zhaoxuan Zhu

DEFENCE ELECTRONICS TECHNOLOGY

- 206 **Forward scattering bistatic radar imaging method and practice data processing**
Yunhe Cao, Tao Zhang, Shouhong Zhang, and Binfeng Luo
- 212 **High resolution radar target adaptive detector and performance assessment**
Tao Jian, You He, Feng Su, Changwen Qu, and Dianfa Ping
- 219 **Long term integration of radar signals with unknown Doppler shift for ubiquitous radar**
Qinglong Bao, Zengping Chen, Yue Zhang, and Jian Yang

SYSTEMS ENGINEERING

- 228 **Dynamic models of technology management capability development based on knowledge diffusion**
Weiwei Wu, Bo Yu, and Jian Wang
- 238 **Bayesian serial revision method for RLLC cluster systems failure prediction**
Qiang Liu, Guang Jin, Jinglun Zhou, Quan Sun, and Min Xi
- 247 **Collaborative supply chain planning under dynamic lot sizing costs with capacity decision**
Hongyan Li, Tianhui You, and Xiaoyi Luo
- 257 **Information rough communication based on both-branch fuzzy set**
Hongkai Wang, Yanyong Guan, and Lei Du
- 263 **New partial cooperation model for bilevel programming problems**

Shihui Jia, Zhongping Wan, Yuqiang Feng, and Guangmin Wang

- 267 New approach to determine the priorities from interval fuzzy preference relations**
Qi Yue, Zhiping Fan, and Lihua Shi

CONTROL THEORY AND APPLICATION

- 274 Intelligent fault-tolerant algorithm with two-stage and feedback for integrated navigation federated filtering**
Li Cong, Honglei Qin, and Zhanzhong Tan
- 283 GPS/VISNAV integrated relative navigation and attitude determination system for ultra-close spacecraft formation flying**
Xiaoliang Wang, Xiaowei Shao, Deren Gong, and Dengping Duan
- 292 Receding horizon H_∞ control for discrete-time Markovian jump linear systems**
Jiwei Wen and Fei Liu
- 300 Fast fine acquisition algorithm of GPS receiver aided by INS information**
Lufeng Zhu, Chunxi Zhang, and Zhiqiang Ma
- 306 State feedback control of network-based systems with packet disordering**
Jinna Li, Shiqian Han, Meng Zheng, Haibin Yu, and Qingling Zhang
- 314 Robust dissipative control for time-delay stochastic jump systems**
Lijuan Xu, Tianping Zhang, and Yang Yi
- 322 Decision tree support vector machine based on genetic algorithm for multi-class classification**
Huanhuan Chen, Qiang Wang, and Yi Shen

SOFTWARE ALGORITHM AND SIMULATION

- 327 Resource allocation for cooperative diversity systems based on quadrature modulation**
Jing Li, Jianhua Ge, Yong Wang, and Ming Gao
- 334 Performance analysis of mobile ad hoc networks under flooding attacks**
Ping Yi, Futai Zou, Yan Zou, and Zhiyang Wang
- 340 Bandwidth adaption for kernel particle filter**
Fu Li, Guangming Shi, Fei Qi, and Li Zhang
- 347 Prediction-based protocol for mobile target tracking in wireless sensor networks**
Liang Xue, Zhixin Liu, and Xinping Guan
- 353 Contourlet transform for image fusion using cycle spinning**
Kun Liu, Lei Guo, and Jingsong Chen
- 358 Image decomposition using adaptive regularization and div (BMO)**
Chengwu Lu and Guoxiang Song
