

Journal of Systems Engineering and Electronics

Volume 24 Number 6

December 2013

CONTENTS

ELECTRONICS TECHNOLOGY

879 On-orbit target tracking and inspection by satellite formation

Guang Zhai, Jingrui Zhang, and Zhicheng Zhou

889 Method of target tracking with Doppler blind zone constraint

Wei Han, Ziyue Tang, and Zhenbo Zhu

899 X-ray pulsar signal detection using photon interarrival time

Qiang Xie, Luping Xu, and Hua Zhang

906 Calculation of angular glint in near field utilizing graphical electromagnetic computing

Guangfu Zhang, Chao Wang, Liguang Liu, Yunqi Fu, and Naichang Yuan

912 Multi-dimensional blind separation method for STBC systems

Minggang Luo, Liping Li, Guobing Qian, and Huaguo Zhang

919 Dynamic threshold for SPWVD parameter Estimation based on Otsu algorithm

Ning Ma and Jianxin Wang

925 New method for constructing array sets with zero-correlation zone

Xiaoyu Chen and Chengqian Xu

DEFENCE ELECTRONICS TECHNOLOGY

931 Hybrid micromotion-scattering center model for synthetic aperture radar micromotion target imaging

Yuliang Qin, Bin Deng, Zonghui Huang, and Wuge Su

938 Cued search algorithm with uncertain detection performance for phased array radars

Jianbin Lu, Hui Xiao, Zemin Xi, and Mingmin Zhang

SYSTEMS ENGINEERING

- 946 Immune multi-agent model using vaccine for cooperative air-defense system of systems for surface warship formation based on danger theory**

Jun Wang, Xiaozhe Zhao, Beiping Xu, Wei Wang, and Zhiyong Niu

- 954 Hybrid optimization of dynamic deployment for networked fire control system**

Chen Chen, Jie Chen, and Bin Xin

- 962 Evaluation matrix with the speed feature based on double inspiring control lines**

Weiwei Liu, Chunsheng Shi, and Jing Li

CONTROL THEORY AND APPLICATION

- 971 Survey on nonlinear reconfigurable flight control**

Xunhong Lv, Bin Jiang, Ruiyun Qi, and Jing Zhao

- 984 Robust D -stability LMI conditions of matrix polytopes via affine parameter-dependent Lyapunov functions**

Pan Xiong, Feng Wang, Xibin Cao, and Guangren Duan

- 992 Trajectory shaping guidance law based on virtual angle with terminal constraints**

Xijing Hu and Xuemei Huang

- 1003 FBFN-based adaptive repetitive control of nonlinearly parameterized systems**

Wenli Sun, Hong Cai, and Fu Zhao

- 1011 Stability of nonlinearly-perturbed systems with time varying delay using LMIs**

S. Jeeva Sathya Theesar and P. Balasubramaniam

SOFTWARE ALGORITHM AND SIMULATION

- 1019 Coded aperture compressive imaging array applied for surveillance systems**

Jing Chen, Yongtian Wang, and Hanxiao Wu

RELIABILITY

- 1029 Integrated importance measure for multi-state coherent systems of k level**

Xibin Zhao, Shubin Si, Hongyan Dui, Zhiqiang Cai, and Shudong Sun

- 1038 Homologous fault monitoring technology of redundant INS in airborne avionics systems**

Xiuzhi Wu, Jizhou Lai, Min Liu, and Pin Lv
