

CONTENTS

ELECTRONICS TECHNOLOGY

- 651 Channel modeling and influenced factors analysis of the broadband dual-orthogonal polarized MIMO land mobile satellite channel**
Qingfeng Jing, Jiajia Wu, Yuping Lu, Xin Liu, and Xiaoju Yan
- 671 Application and improvement of wavelet packet de-noising in satellite transponder**
Yannian Lou, Chaojie Zhang, Xiaojun Jin, and Zhonghe Jin
- 680 Semidefinite programming approach for TDOA/GROA based source localization**
Yanshen Du, Ping Wei, and Huaguo Zhang
- 688 Wideband direction-of-arrival estimation based on cubic spline function**
Hongqi Yu, David Day-Uei Li, Kun Zhang, Jietao Diao, and Haijun Liu
- 694 Full-duplex prototype based on joint passive and digital cancellation method**
Di Wu, Can Zhang, Shaoshuai Gao, and Heping Zhao

DEFENCE ELECTRONICS TECHNOLOGY

- 705 Adaptive coherence estimator based on the Krylov subspace technique for airborne radar**
Weijian Liu, Wenchong Xie, Haibo Tong, Honglin Wang, Cui Zhou, and Yongliang Wang
- 713 ISAR active jamming method based on sinusoidal modulation**
Yu Zhang, Congfeng Liu, and Yan Zhu
- 720 Target detection and recognition in SAR imagery based on KFDA**
Fei Gao, Jingyuan Mei, Jinping Sun, Jun Wang, Erfu Yang, and Amir Hussain
- 732 Application of DFT in bi-static RCS calculation of complex electrically large targets**
Kuisong Zheng, Tengjiang Ding, Hui Yu, and Zhaoguo Hou
- 739 Optimal ship imaging for shore-based ISAR using DCF estimation**
Ling Wang, Zhenxiao Cao, Ning Li, Teng Jing, and Daiyin Zhu
- 746 Tracking a maneuvering target in clutter with out-of-sequence measurements for airborne radar**
Weihua Wu, Jing Jiang, and Yang Wan

SYSTEMS ENGINEERING

- 754 Modeling and verifying SoS performance requirements of C4ISR systems**
Yudong Qi, Zhixue Wang, Qingchao Dong, and Hongyue He
- 764 Multi-criteria group decision making with fuzzy data: an extension of the VIKOR method**
Wenqi Jiang and Jennifer Shang
- 774 Entropy measures of type-2 intuitionistic fuzzy sets and type-2 triangular intuitionistic trapezoidal fuzzy sets**
Zhensong Chen, Shenghua Xiong, Yanlai Li, and Kwai-Sang Chin
- 794 Comprehensive optimized GM(1,1) model and application for short term forecasting of Chinese energy consumption and production**
Ning Xu, Yaoguo Dang, and Jie Cui

CONTROL THEORY AND APPLICATION

- 802 BTT autopilot design for agile missiles with aerodynamic uncertainty**
Yueyue Ma, Jie Guo, and Shengjing Tang
- 813 Hierarchical structured robust adaptive attitude controller design for reusable launch vehicles**
Guangxue Yu and Huifeng Li
- 826 Adaptive backstepping finite-time sliding mode control of spacecraft attitude tracking**
Chutipon Pukdeboon
- 840 Feature extension and matching for mobile robot global localization**
Peng Wang, Qibin Zhang, and Zonghai Chen

SOFTWARE ALGORITHM AND SIMULATION

- 847 Task scheduling and virtual machine allocation policy in cloud computing environment**
Xiong Fu and Yeliang Cang
- 857 Monitoring time property in time-sensitive LSC**
Haiyang Xu, Yi Zhuang, and Jingjing Gu
- 868 Numerical differentiation of noisy data with local optimum by data segmentation**
Jianhua Zhang, Xiufu Que, Wei Chen, Yuanhao Huang, and Lianqiao Yang
- 877 Immune adaptive Gaussian mixture particle filter for state estimation**
Wenlong Huang, Xiaodan Wang, Yi Wang, and Guohong Li
- 886 Approximate trace and singleton failures equivalences for transition systems**
Chao Wang, Jinzhao Wu, and Hongyan Tan
