

CONTENTS

ELECTRONICS TECHNOLOGY

- 555 Optimal set integer programming algorithm for multiple maneuvering targets tracking in clutter**
Xiaoyan Fu, Yingmin Jia, and Xiaohe Liu
- 564 Improved spectrum sharing algorithm based on feedback control information in cognitive radio networks**
Yibing Li, Rui Yang, Fang Ye, and Zhenguo Gao
- 571 Joint power control and relay selection scheme for cognitive two-way relay networks**
Dingcheng Yang, Lin Xiao, Jisheng Xu, and Wengang Li
- 579 Maximal-minimal correlation atoms algorithm for sparse recovery**
Wei Gan, Luping Xu, and Hua Zhang
- 586 Dual loop feedback pre-distortion in satellite communication**
Chengkai Tang, Baowang Lian, and Yi Zhang
- 592 Novel passive localization algorithm based on weighted restricted total least square**
Changwen Qu, Zheng Xu, and Changhai Wang
- 600 Direction and polarization estimation for coherent sources using vector sensors**
Jun Liu, Zheng Liu, and Qin Liu

DEFENCE ELECTRONICS TECHNOLOGY

- 606 Multi-view ladar data registration in obscure environment**
Mingbo Zhao, Jun He, Wei Qiu, and Qiang Fu
- 617 Orthogonal discrete frequency coding waveform design based on chaos**
Yuxing Peng, Jin Yang, Zhaokun Qiu, and Xiang Li

SYSTEMS ENGINEERING

- 625 New approach to eliminate structural redundancy in case resource pools using α mutual information**

Man Xu, Haiyan Yu, and Jiang Shen

- 634 Consensus intuitionistic fuzzy group decision-making method for aircraft cockpit display and control system evaluation**

Tao Geng, An Zhang, and Guangshan Lu

- 642 Stochastic programming approach for earthquake disaster relief mobilization with multiple objectives**

Yajie Liu, Tao Zhang, Hongtao Lei, and Bo Guo

CONTROL THEORY AND APPLICATION

- 655 Adaptive unscented Kalman filter for parameter and state estimation of nonlinear high-speed objects**

Fang Deng, Jie Chen, and Chen Chen

- 666 Two-dimensional Hurwitz-Schur stability test of linear systems with interval delays**

Qina Gao, Ying Zhu, and Yang Xiao

- 674 Reduced-order Kalman filtering for state constrained linear systems**

Chaoyang Jiang and Yongan Zhang

SOFTWARE ALGORITHM AND SIMULATION

- 683 Collaborative multi-agent reinforcement learning based on experience propagation**

Min Fang and Frans C.A. Groen

- 690 Improved gravitational search algorithm based on free search differential evolution**

Yong Liu and Liang Ma

RELIABILITY

- 699 Generalized reliability measures of Kalman filtering for precise point positioning**

Changhui Xu, Xiaoping Rui, Xianfeng Song, and Jingxiang Gao

- 706 Data-driven fault diagnosis method for analog circuits based on robust competitive agglomeration**

Rongling Lang, Zheping Xu, and Fei Gao
