

Journal of Systems Engineering and Electronics

Volume 26 Number 6

December 2015

CONTENTS

ELECTRONICS TECHNOLOGY

- 1135 Sequential nonlinear tracking filter without requirement of measurement decorrelation**
Gongjian Zhou, Junhao Xie, Rongqing Xu, and Taifan Quan
- 1142 Multi-dimensional and complicated electromagnetic interference hardware-in-the-loop simulation method**
Shuxia Guo, Yafeng Wang, Ruibing Liu, and Ying Gao
- 1149 Stability analysis of wireless network with improved fluid model**
Zhichao Zhou, Yang Xiao, and Dong Wang
- 1159 Short-time Lv transform and its application for non-linear FM signal detection**
Shan Luo, Xiumei Li, and Guoan Bi
- 1169 Code acquisition method based on wavelet transform filtering**
Chao Wu, Luping Xu, Hua Zhang, and Wenbo Zhao
- 1177 Null subcarriers based Doppler scale estimation with polynomial interpolation for multicarrier communication over ultrawideband underwater acoustic channels**
Yang Chen, Jingwei Yin, Ling Zou, Dan Yang, and Yuan Cao
- 1184 Space-division multiple access for CDMA multiuser underwater acoustic communications**
Jingwei Yin, Pengyu Du, Guang Yang, and Huanling Zhou
- 1191 Variance-based fingerprint distance adjustment algorithm for indoor localization**
Xiaolong Xu, Yu Tang, Xinheng Wang, and Yun Zhang
- 1202 Radio map updated method based on subscriber locations in indoor WLAN localization**
Ying Xia, Zhongzhao Zhang, and Lin Ma
- 1210 Performance evaluation of multiple relays cooperative GBn-ARQ with limited retransmission**
Suoping Li, Yongqiang Zhou, Xijuan Yang, and Zufang Dou

DEFENCE ELECTRONICS TECHNOLOGY

- 1216 Novel supervised classification approach for multifrequency polarimetric SAR data**
Biao You, Bin Xu, Jian Yang, Chunmao Yeh, and Jianshe Song

1222 SAR imaging method based on coprime sampling and nested sparse sampling
Hongyin Shi and Baojing Jia

1229 Improved multi-target radar TBD algorithm
Xin Bi, Jinsong Du, Qingshi Zhang, and Wei Wang

SYSTEMS ENGINEERING

1236 Distributed blackboard decision-making framework for collaborative planning based on nested genetic algorithm
Yaozhong Zhang, Lei Zhang, and Zhiqiang Du

1244 Determining winner in multi-attribute procurement auction: a method based on technical and business experts' evaluation information
Guangxin Gao, Zhiping Fan, and Yang Liu

1254 Fundamental definitions and calculation rules of grey mathematics: a review work
Qiaoxing Li, Sifeng Liu, and Jeffrey Yi-Lin Forrest

CONTROL THEORY AND APPLICATION

1268 Improved optimal steering law for SGCMG and adaptive attitude control of flexible spacecraft
Lu Wang, Yu Guo, Liping Wu, and Qingwei Chen

1277 Reentry trajectory rapid optimization for hypersonic vehicle satisfying waypoint and no-fly zone constraints
Lu Wang, Qinghua Xing, and Yifan Mao

SOFTWARE ALGORITHM AND SIMULATION

1291 Saliency detection and edge feature matching approach for crater extraction
An Liu, Donghua Zhou, Lixin Chen, and Maoyin Chen

1301 Efficiency improvement of ant colony optimization in solving the moderate LTSP
Munan Li

1310 Digital watermarking algorithm based on scale-invariant feature regions in non-subsampled contourlet transform domain
Jian Zhao, Na Zhang, Jian Jia, and Huanwei Wang

RELIABILITY

1316 Representations for reliability functions of conditional coherent systems with INID components and ordered properties
Zhengcheng Zhang and Narayanaswamy Balakrishnan

1325 Automatic software fault localization based on artificial bee colony
Linzhi Huang and Jun Ai
