

CONTENTS

ELECTRONICS TECHNOLOGY

- 1135 Novel polarimetric detector for target detection in heterogeneous clutter**
Xu Cheng, Longfei Shi, Yuliang Chang, Yongzhen Li, and Xuesong Wang
- 1142 Direction-of-arrival estimation for uniform circular arrays under small sample size**
Guojun Jiang, Xingpeng Mao, and Yongtan Liu
- 1151 Global track extraction for probability hypothesis density filter**
Feng Yang, Xi Shi, Keli Liu, Yan Liang, and Hao Chen
- 1158 Analysis of an improved acquisition method for high-dynamic BOC signal**
Yi Pan, Tianqi Zhang, Gang Zhang, and Zhongtao Luo

DEFENCE ELECTRONICS TECHNOLOGY

- 1168 Full aperture imaging algorithm for highly squinted TOPS SAR**
Sheng Zhang, Guangcai Sun, and Mengdao Xing
- 1176 SAR imaging method for sea scene target based on improved phase retrieval algorithm**
Hongyin Shi, Qiuxiao Zhou, Xiaoyan Yang, and Qiusheng Lian
- 1183 Cognate pulse sorting method based on beam missions characteristics**
Wenlong Lu, Junwei Xie, Heming Wang, and Chuan Sheng

SYSTEMS ENGINEERING

- 1191 Role-based approaches for operational tasks modeling and flexible decomposition**
Zhigang Zou, Wangfang Che, Shusheng Wang, Yun Bai, and Fan Chengli
- 1207 UAV target tracking algorithm based on task allocation consensus**
Yani Cui, Jia Ren, Wencai Du, and Jingguo Dai
- 1219 Integrated evaluation approach for node importance of complex networks based on relative entropy**
Bin Chen, Zhixue Wang, and Chen Luo
- 1227 Success probability orientated optimization model for resource allocation of the technological innovation multi-project system**
Weixu Dai, Weiwei Wu, Bo Yu, and Yunhao Zhu

CONTROL THEORY AND APPLICATION

- 1238 Output-feedback based partial integrated missile guidance and control law design**
Xuejiao Sun, Rui Zhou, and Delong Hou
- 1249 Nonlinear dynamics of fixed-trim reentry vehicles with moving-mass roll control system**
Yafei Wang, Jianqiao Yu, Yuesong Mei, Linlin Wang, and Xiaolong Su
- 1262 Distributed tracking control of unmanned aerial vehicles under wind disturbance and model uncertainty**
Kun Zhang and Xiaoguang Gao
- 1272 Optimal obstacle avoidance via distributed consensus algorithms with communication delay**
Jingliang Sun and Chunsheng Liu
- 1283 Component fault diagnosis for nonlinear systems**
Junjie Huang, Zhen Jiang, and Junwei Zhao

SOFTWARE ALGORITHM AND SIMULATION

- 1291 Optimization of projectile state and trajectory of reentry body considering attainment of carrying aircraft**
Changsheng Gao, Chunwang Jiang, and Wuxing Jing
- 1303 Frequency domain based super-resolution method for Mixed-resolution multi-view images**
Zhizhong Fu, Yawei Li, Yuan Li, Lan Ding, and Keyu Long
- 1315 Semi-supervised classification based on p-norm multiple kernel learning with manifold regularization**
Tao Yang and Dongmei Fu

RELIABILITY

- 1326 Reliability analysis of monotone coherent multi-state systems based on Bayesian networks**
Binghua Song, Zhongbao Zhou, Chaoqun Ma, Jinglun Zhou, and Shaofeng Geng
