

CONTENTS

ELECTRONICS TECHNOLOGY

199 Near field 3-D imaging approach for joint high-resolution imaging and phase error correction

Yang Fang, Baoping Wang, Chao Sun, Zuxun Song, and Shuzhen Wang

212 NYFR output pulse radar signal TOA analysis using extended Fourier transform and its TOA estimation

Zhaoyang Qiu, Pei Wang, Jun Zhu, and Bin Tang

224 Signal recovery method based on co-prime array

Shuang Qiu, Weixing Sheng, Xiaofeng Ma, Yubing Han, and Renli Zhang

235 Blind recognition of k/n rate convolutional encoders from noisy observation

Li Huang, Wengu Chen, Enhong Chen, and Hong Chen

244 Passive ranging technique using waveguide invariant in shallow water with thermocline

Xuejing Song, Anbang Zhao, and Maozhen Li

251 Technology and test results of space adaptability of passive hydrogen maser

Hefei Zheng, Lianshan Gao, Keming Feng, Jing Li, Wenming Wang, Chunyan Cao, and Jihong Zhang

DEFENCE ELECTRONICS TECHNOLOGY

257 Angle estimation for bistatic MIMO radar with unknown mutual coupling based on three-way compressive sensing

Xinhai Wang, Gong Zhang, Fangqing Wen, De Ben, and Wenbo Liu

267 Autofocus technique for ISAR imaging of uniformly rotating targets based on the ExCoV method

Chengguang Wu, Hongqiang Wang, Bjin Deng, Yuliang Qin, and Wuge Su

276 SAR target recognition based on active contour without edges

Rui Zhang and Min Zhang

SYSTEMS ENGINEERING

- 282 Statistical prediction of failure times under generalized progressive hybrid censoring in a simple step-stress accelerated competing risks model**
Chunfang Zhang and Yimin Shi
- 292 Visualization analysis of the capability of weapon system of systems for multi-dimensional indicators**
Jianfei Ding, Guangya Si, Guoqiang Yang, Yang Liu, and Xiao Liu
- 301 Modeling and applying credible interval intuitionistic fuzzy reciprocal preference relations in group decision making**
Wei Zhou and Zeshui Xu
- 315 Generalized Lanchester warfare model characterized by information asymmetry effect**
Weiwen Hu, Dan Mei, and Yongkai Liu

CONTROL THEORY AND APPLICATION

- 322 Observer-based backstepping longitudinal control for carrier-based UAV with actuator faults**
Fengying Zheng, Ziyang Zhen, and Huajun Gong
- 338 Finite-time adaptive sliding mode control for heavyweight airdrop operations**
Ri Liu, Xiuxia Sun, Wenhan Dong, and Dong Wang
- 347 Generalization of integral inequalities and (c_1, c_1) stability of neutral differential equations with time-varying delays**
Shuli Guo and Lina Han

SOFTWARE ALGORITHM AND SIMULATION

- 361 Modeling and inferring 2.1D sketch with mixed Markov random field**
Anlong Ming, Yu Zhou, and Tianfu Wu
- 374 Tag clustering algorithm LMMSK: improved K-means algorithm based on latent semantic analysis**
Jing Yang and Jun Wang

RELIABILITY

- 385 Bayesian-based information extraction and aggregation approach for multilevel systems with multi-source data**
Lechang Yang, Jianguo Zhang, Yanling Guo, and Qian Wang
- 401 Time-varying reliability indexes for multi-AUV cooperative system**
Qingwei Liang, Tianyuan Sun, and Dongdong Wang
- 407 Reliability analysis for WSN based on a modular k -out-of- n system**
Hailin Feng and Jieyu Dong
