

## Contents

- Editorial: Lighting and climate change**  
*P Boyce*
- Opinion: The role of energy efficiency in the light and health conversation** 981  
*A Wilkerson*
- Cross-validation and robustness of daylight glare metrics** 982  
*J Wienold, T Iwata, MS Khanie, E Erell, E Kaftan, RG Rodriguez, JAY Garreton, T Tzempelikos, I Konstantzos, J Christoffersen, TE Kuhn, C Pierson and M Andersen*
- Towards a user preference model for interior lighting Part 1: Concept of the user preference model and experimental method** 983  
*TQ Khanh, P Bodrogi, X Guo and PQ Anh*
- Towards a user preference model for interior lighting. Part 2: Experimental results and modelling** 1014  
*TQ Khanh, P Bodrogi, X Guo and PQ Anh*
- Effect of daylight LED on visual comfort, melatonin, mood, waking performance and sleep** 1030  
*C Cajochen, M Freyburger, T Basishvili, C Garbazza, F Rudzik, C Renz, K Kobayashi, Y Shirakawa, O Stefani and J Weibel*
- A novel measure to analyse the reliability of LED luminaires** 1044  
*AN Padmasali and SG Kini*
- Four-component, white LED with good colour quality and minimum damage to traditional Chinese paintings** 1063  
*R Dang, N Wang, G Liu and H Tan*
- Estimating the relative contribution of streetlights, vehicles, and residential lighting to the urban night sky brightness** 1077  
*S Bará, A Rodríguez-Arós, M Pérez, B Tosar, RC Lima, A Sánchez de Miguel and J Zamorano*
- The effects of using passing beams during the day in real traffic conditions** 1092  
*P Kępa and W Żagan*
- Designing double freeform surfaces for point source and extended sources using a construction, iteration and optimization process** 1108  
*J Lai, X Li and P Ge*
- Four minutes might not be enough for light colour temperature to affect sleepiness, mental effort, and light ratings** 1118  
*R Lasauskaite, EM Hazelhoff and C Cajochen*
- 1128

All figures that were originally provided in colour will appear in colour online
