Editorial

Fifty years of quality assurance

E Patterson

74

Original Articles

Experimental identification of flow properties of a S355 structural steel for hot deformation processes

D Schmicker, S Paczulla, S Nitzschke, S Groschopp, K Naumenko, S Jüttner and J Strackeljan

75

Inverse determination of the regularized residual stress and eigenstrain fields due to surface peening

SA Faghidian

84

Space-compatible strain gauges as an integration aid for the James Webb Space Telescope
Mid-Infrared Instrument

P Samara-Ratna, J Sykes, C Bicknell, J Pye, NC Jessen, HU Nøgaard-Nielsen

92

Constitutive modeling of elastic-visco-plastic behaviors in aluminum alloys subjected to cyclic
loadings at various strain rates

M Felfeli, M Azadi and GH Farrahi

103

A new approach for the correction of stress-strain curves after necking in metals

G-H Majzoobi, F Fariba, MK Pipelzadeh and SJ Hardy

125

Extension of an energy-based life prediction method to low and combined cycle fatigue regimes

C Holycross, M-H Herman Shen, O Scott-Emuakpor and T George

138
