## Special issue on Validation

**Guest Editors: Erwin Hack and George Lampeas**

### Editorial

- Advances in Validation of Computational Mechanics Models 3  
*E Hack and G Lampeas*

### Special Issue Articles

- An evaluation of a protocol for the validation of computational solid mechanics models 5  
*E Hack, G Lampeas and EA Patterson*
- Decomposition-based calibration/validation metrics for use with full-field measurement situations 14  
*R Allemang, MM Kolluri, M Spottswood and T Eason*
- New methods for pre- and post-processing of stochastic simulations 32  
*S Klostermann and DC Vogt*
- A hysteretic multiscale formulation for validating computational models of heterogeneous structures 46  
*SP Triantafyllou and EN Chatzi*
- Model tuning in engineering: Uncovering the logic 63  
*K Steele and C Werndl*
- Maintaining a grasp on reality – Is our validation and design effort focused in the same direction? 72  
*M Price and A Murphy*
- An inter-laboratory study of the calibration of optical full-field systems for measuring deformation 90  
*E Hack*
