Editorial

- Strain analysis in a post-modernist world 559
E Patterson

Original Articles

- Evaluation of a numerical model for tapered threaded connections subjected to combined loading using enhanced experimental measurement techniques 561
T Galle, WD Waele, JV Wittenberghe and PD Baets
- Effects of pre-fatigue on the strain localization during tensile tests of DP 500 steel at low and high strain rates 571
W Moćko, A Brodecki and J Radziejewska
- A microstrain measurement methodology applied to multiscale hydroforming of annealed ASTM 304 stainless steel sheet 584
WJ Emblom, M Aithal, RJ Jones, TC Pesacreta, GA Glass, MFS Ibne Islam and SW Wagner
- Numerical analysis of the influence of the damping rings' dimensions on interrupted dynamic tension experiment results 594
RA González-Lezcano and JM del Rio
- An experimentally validated contour method/eigenstrains hybrid model to incorporate residual stresses in glass structural designs 614
M Achintha and BA Balan
