

## Contents

### Original articles

- Numerical simulation and experimental study on stress deformation of braided wire rope 69  
*H Wang, C Fu, W Cui, X Zhao and S Qie*
- Closed-form solutions of hole distortion for use in deep-hole drilling measurements of residual stress in orthotropic plates 77  
*C Garza, A Shterenlikht, MJ Pavier and DJ Smith*
- Uncertainty analysis of residual stresses measured by slitting method in equal-channel angular rolled Al-1060 strips 83  
*M Kotobi and M Honarpisheh*
- A modification to the cross slitting method for measuring two components of residual stresses 93  
*AH Mahmoudi and AR Hasani*
- Residual stresses due to roll bending of bi-layer Al-Cu sheet: Experimental and analytical investigations 102  
*M Sedighi, J Joudaki and H Kheder*
- Coupon specimen-based approach for the simulation of crossbore stress and strain state 112  
*M Kiani, R Forest, SM Tipton and MW Keller*
- Direct tension-dependent flexural behavior of ultra-high-performance fiber-reinforced concretes 121  
*D-L Nguyen, D-K Thai and D-J Kim*
