# JOURNAL OF STRAIN ANALYSIS FOR ENGINEERING DESIGN

---

Volume 46 Issue 6 August 2011 ISSN 0309-3247

## CONTENTS

- Concentration of shear stresses in shallow periodic notches** 397  
E Dragoni and D Castagnetti
- Equivalent stress and strain distribution in helical compression springs subjected to bending** 405  
S G Keller and A P Gordon
- Prediction of creep properties for two nickel-base superalloys from stress relaxation testing** 416  
J Beddoes
- Ultimate strain and deformability of elementary flax fibres** 428  
J Andersons, E Poriķe, and E Spārniņš
- An incremental formulation for half-plane contact problems subject to varying normal load, shear, and tension** 436  
D A Hills, M Davies, and J R Barber
- Numerical and experimental investigations on the modification of as-welded residual stress after local material removal** 444  
C Liu and J Zhang
- Weld zone representation during the formability prediction of friction stir welded blanks with similar thickness sheets** 456  
P J Ramulu and R Ganesh Narayanan
- Normalization of the stress concentrations at the rounded edges of a shaft-hub interference fit** 478  
A Strozzi, A Baldini, M Giacomini, E Bertocchi, and L Bertocchi
- Fatigue microcrack detection with digital image correlation** 492  
J Rupil, S Roux, F Hild, and L Vincent
- Predictions of three-dimensional stress variations in indented pipes due to internal pressure fluctuations** 510  
T H Hyde, R Luo, and A A Becker
