

## Contents

### Editorial

- Challenges in experimental strain analysis: Interfaces and temperature extremes 282  
*E Patterson*

### Original Articles

- A constitutive model for hardness considering the effects of strain, strain rate and temperature 284  
*G-H Majzoobi, J Mohammadi, MK Pipelzadeh, S Lahmi and SJ Hardy*
- Three-dimensional effects at the tip of rounded notches subjected to mode-I loading under cyclic plasticity 299  
*C Marangon, A Campagnolo and F Berto*
- Experimental modeling of strain-dependent cyclic plasticity for prediction of hysteresis curve 314  
*E Khademi, GH Majzoobi, N Bonora and D Gentile*
- Analysis of bearing characteristics of axially heavy-loaded composite nut 325  
*Z Chunjiang, L Yongfeng, H Xiaodong, G Hailian, L Yugui and H Qingxue*
- Uncertainty of residual stresses analysis in slitting method: A case study of roll-bending process 335  
*M Sedighi, J Joudaki and M Kotobi*
