

Contents

Original Articles

- Concentration of torsional shear stresses in axisymmetric bars with deep periodic grooves 66
D Castagnetti and E Dragoni
- Effects of the weld groove shape and geometry on residual stresses in dissimilar butt-welded pipes 73
D Akbari, M Farahani and N Soltani
- Fatigue crack growth "overload effect": mechanistic insights from in-situ synchrotron measurements 83
M Croft, N Jisrawi, A Ignatov, RL Holtz and Z Zhong
- Determination of sharp V-notch stress intensity factors using the extended finite element method 95
T Yu and L Shi
- Effects of temperature and strain rate on the dynamic responses of three polymer-bonded explosives 104
J Li, F Lu, J Qin, R Chen, P Zhao, L Lan and S Jing
- Local compliance, stress concentrations and strength in orthotropic materials 113
J Rhee, H-K Cho, DJ Marr and RE Rowlands
