Figure 8. Schematic diagram of a material with a central region of interest. The diagram shows the top, bottom, and side surfaces of the material. The central region is shaded with a grid pattern, and the surrounding areas are labeled with their respective surface orientations.

Figure 9. Schematic diagram of a material with a central region of interest. The diagram shows the top, bottom, and side surfaces of the material. The central region is shaded with a grid pattern, and the surrounding areas are labeled with their respective surface orientations.
