

Contents

Original Articles

- A two-parameter approach to assess effects of constraint in cracks located at geometrical discontinuities 274
GVP Donato, JMA Rebello and C Ruggieri
- Formability of adhesive-bonded steel sheets with artificial finite adhesive defects 286
V Satheeskumar and RG Narayanan
- Measurement of local relative displacements in large structures 301
A Tesaro, MA Eder and M Nielsen
- Volume change in polyetheretherketone under compression loads over wide ranges of strain rate and temperature 315
Z El-Qubaa and R Othman
- A generalized cycle counting criterion for arbitrary multi-axial fatigue loading conditions 325
Z Wei and P Dong
- Determination of the constants of material models at high strain rates and elevated temperatures using shot impact test 342
G-H Majzoobi, AR Hosseinkhani, S Lahmi, MK Pipelzadeh and SJ Hardy
- Some analytical and numerical expressions for evaluation of the critical J-integral in plates with blunt V-notches under Mode I loading 352
F Noori-Azghad, H Khademizadeh and E Barati

Review Article

- A critical assessment of automatic photoelastic methods for the analysis of edge residual stresses in glass 361
A Ajovalasit, G Petrucci and M Scafidi
