

Editorial of the Special Issue on the
EUROMECH Colloquium 575

Contents

Special issue: EUROMECH 575

Editorial

- Editorial of the Special Issue on the EUROMECH Colloquium 575 239
M Paggi and DA Hills

Special issue articles

- A review of the use of the asymptotic framework for quantification of fretting fatigue 240
DA Hills and D Dini
- General procedure for solution of contact problems under dynamic normal and tangential loading
based on the known solution of normal contact problem 247
VL Popov, R Pohrt and M Heß
- Thin film bonded to elastic orthotropic substrate under thermal loading 256
FO Falope, L Lanzoni, E Radi and AM Tarantino
- Nominally static frictional contacts under periodic loading 270
JR Barber
- Optimal normal load variation in wedge-shaped Coulomb dampers 279
A Papangelo and M Ciavarella
- Adhesion effect in sliding of a periodic surface and an individual indenter upon a viscoelastic base 286
I Goryacheva and Y Makhovskaya
- Impact problem for the quasi-linear viscoelastic standard solid model 294
II Argatov, NS Selyutina and GS Mishuris
- Analytical evaluation of the peak contact pressure in a rectangular elastomeric seal with rounded edges 304
A Strozzi, E Bertocchi, S Mantovani, M Giacomini and A Baldini
- Two-dimensional indentation of microstructured solids characterized by couple-stress elasticity 318
P Gourgietis and T Zisis
