

# JOURNAL OF STRAIN ANALYSIS FOR ENGINEERING DESIGN

00206

Volume 46 Issue 8 November 2011 ISSN 0309-3247

## CONTENTS

- Constrained least-squares solution and regularization in inverse boundary element analysis of photoelastic models involving contact** 709  
I A Jones, P Wang, and A A Becker
- Cyclic loading behaviour of thick cylindrical vessels under creep deformation** 727  
H Mahbadi and M R Eslami
- A new concept in obtaining a forming limit diagram of tailor welded blanks** 740  
A Menhaj, M Abbasi, M Sedighi, and M Ketabchi
- A combined dimensional analysis and optimization approach for determining elastic-plastic properties from indentation tests** 749  
J J Kang, A A Becker, and W Sun
- Maximum equivalent stress in a pin-loaded lug in the presence of initial clearance** 760  
A Strozzi, A Baldini, M Giacomini, E Bertocchi, and L Bertocchi
- Thermomechanical deformations in photovoltaic laminates** 772  
M Paggi, S Kajari-Schröder, and U Eitner
- Combined thermoelastic stress analysis and digital image correlation with a single infrared camera** 783  
M L Silva and G Ravichandran
- Thermomechanical behaviours of strip and work-rolls in cold rolling process** 794  
B Koohbor and S Serajzadeh
- Experimental, theoretical, and numerical studies on the response of square plates subjected to blast loading** 805  
K H Safari, J Zamani, S M R Khalili, and S Jalili
- Effect of fibre transverse isotropy on micro-residual stresses in polymeric composites** 817  
M M Shokrieh and M Safarabadi
- Stiffness and design for strength of trapezoidal Belleville springs** 825  
N L Pedersen and P Pedersen
- Effect of spatial variation of stress-free lattice spacings on measured residual stresses** 837  
M Law and V Luzin
- Determination of creep and damage properties for P92 at 675 °C** 842  
M Saber, D W J Tanner, W Sun, and T H Hyde
- A comparison between rapid expressions for evaluation of the critical J-integral in plates with U-notches under mode I loading** 852  
E Barati and F Berto
- On the use of non-cylindrical specimens in a split-Hopkinson pressure bar** 866  
O Sen, S A Tekalur, and P Maity
- On the migration of smooth particle hydrodynamic formulation in Cartesian coordinates to the axisymmetric formulation** 879  
M Lee and Y J Cho
