Contents

130	Access this journal online	153	A dual-band voltage-controlled oscillator in 0.13μm CMOS technology
131	Structural and impedance spectroscopy study of Al-doped ZnO nanorods grown by sol-gel method <i>Muhammad Kashif, Uda Hashim, Md. Eaqub Ali, Ala'eddin A. Saif, Syed Muhammad Usman Ali and Magnus Willander</i>		<i>Siti Maisurah Mohd Hassan, Mohd Azmi Ismail, Nazif Emran Farid, Norman Fadhil Idham Muhammad and Ahmad Ismat Abdul Rahim</i>
136	Analysis of dark current dependent upon threading dislocations in Ge/Si heterojunction photodetectors <i>Ying Wei, Xueyuan Cai, Jinzhi Ran and Jianhong Yang</i>	163	Analysis of warpage and residual stress in plastic ball grid array package after post mold cure <i>Sung Yi and Tatiana M. Lam</i>
141	A new time-dependent mobility degradation model for MOS transistors <i>Yasin Özcelep and Ayten Kuntman</i>	172	Industry news
145	Finite element modeling of channel sag in LTCC <i>Eszter Horvath, Gabor Henap and Gabor Harsanyi</i>	173	New products
		176	Exhibitions and conferences
		182	International diary
