

## Editorial

- 583 Human settlement, civil engineering and silk road – Xi'an Jiaotong University, 120-year anniversary**  
C. Yu

## Original Papers

- 589 Assessment on acoustical performance of green office buildings in Malaysia**  
N. A. A. Jalil, N. bin Che Din and N. Keumala
- 603 The effect of vegetation on indoor and outdoor thermal comfort conditions: Evidence from a microscale study of two similar urban buildings in Akure, Nigeria**  
T. E. Morakinyo, O. B. Adegun and A. A. Balogun
- 618 Investigation of the differences between factors affecting vandalism in urban green areas**  
T. Yilmaz and R. Olgun
- 626 Natural radioactivity, radon exhalation rate and radiation dose of fly ash used as building materials in Xiangyang, China**  
T. Feng and X. Lu
- 635 Laboratory study of PCB transport from primary sources to building materials**  
X. Liu, Z. Guo, K. A. Krebs, D. J. Greenwell, N. F. Roache, R. A. Stinson, J. A. Nardin and R. H. Pope
- 651 Performance of a dry cooling and dedicated ventilation system under different operating conditions**  
H. Chen, W. L. Lee and A.-X. Wu
- 659 The impact of paintings hung on lecture room walls on the speech intelligibility and perception of background noise**  
M. Čudina, J. Prezelj and M. Pušlar-Čudina
- 674 Simulation of the influence of an attic on the building energy efficiency in the Portuguese climate**  
J. S. Carlos
- 691 An east-facing anidolic daylighting system on a tropical urban house**  
F. Binarti and P. Satwiko
- 703 Analysis of vertical sky components under various CIE standard general skies**  
D. H. W. Li, C. Li, S. W. Lou, E. K. W. Tsang and J. C. Lam
- 712 Indoor environmental quality of high occupancy dormitory buildings in winter in Shanghai, China**  
N. Zhang, Y. Kang, K. Zhong and J. Liu
