

Contents

Editorial

- 587 **Source control: A European perspective**
D. R. Crump

Original Papers

- 590 **A step towards the optimization of the indoor luminous environment by genetic algorithms**
B. Mattoni, P. Gori and F. Bisegna
- 608 **Investigation of particle deposition efficiency enhancement in turbulent duct air flow by surface ribs with hybrid-size ribs**
H. Lu and L. Lu
- 621 **Radon and its decay products in an air-conditioned auditorium in correlation with indoor air parameters**
B. Polednik, K. Kozak, J. Mazur, M. Dudzińska and D. Grządziel
- 631 **Ozone deposition velocities on cotton clothing surface determined by the field and laboratory emission cell**
Y. Di, J. Mo, Y. Zhang and J. Deng

- 642 **The correction coefficients for the building air-conditioning load accounting for the whole building hygrothermal transfer process for major cities in China**
Y. Wang, Y. Liu, D. Wang and J. Liu
- 662 **The indoor thermal environment of rural school classrooms in Northwestern China**
Y. Liu, J. Jiang, D. Wang and J. Liu
- 680 **Simulation of indoor comfort level in a building cooled by a cooling tower-concrete core cooling system under hot-semiarid climatic conditions**
D. G. Leo Samuel, S. M. Shiva Nagendra and M. P. Maiya
- 694 **Investigation of indoor environmental quality in urban dwellings with schoolchildren in Beijing, China**
G. Fan, J. Xie, J. Liu and H. Yoshino
- 717 **Daylighting performance improvement of a light-shelf using diffused reflection**
H. Lee, G. Jeon, J. Seo and Y. Kim
