

Building Services Engineering Research & Technology

Contents

Articles

- Accounting for refrigeration heat exchange in energy performance simulations of large food retail buildings
J Parker, D Glew, M Fletcher, F Thomas and C Gorse 253
- Quantifying the performance of a passive deaerator in a gas-fired closed loop domestic wet central heating system
D Johnston, D Glew, D Miles-Shenton, M Benjaber and R Fitton 269
- Effects of pumping station configuration on the energy performance of district cooling systems
ACW Lo, P Jones and FWH Yik 287
- Operating characteristics of the variable frequency speed-regulating system for a single pump in a closed system
Y Song and J Zhao 309
- Monthly utilisation factors for building energy calculations
R Hitchin 318
- A method to estimate the heating and cooling degree-days for different climatic zones of Saudi Arabia
M Indraganti and D Boussaa 327
- Review**
- The building performance gap: Are modellers literate?
S Imam, DA Coley and I Walker 351
