

# Building Services Engineering Research & Technology

---

Volume 35, Number 3, 2014

## Contents

### Articles

- Analysis of thermal compressor efficiency in case of geothermal energy sources  
*F Kalmár and G Szabó* 237
- Environmental conditions and the prevalence of norovirus in hospital building drainage system wastewater and airflows  
*M Gormley, KE Templeton, DA Kelly and A Hardie* 244
- Automatic detection of depleted fixture trap seals using the reflected wave technique  
*DA Kelly and M Gormley* 254
- An analysis of wind energy potential for micro wind turbine in Hong Kong  
*DHW Li, KL Cheung, WWH Chan, CCK Cheng and TCH Wong* 268
- Effect of building envelope on thermal environmental conditions of a naturally ventilated building block in tropical climate  
*S Dhaka, J Mathur and V Garg* 280
- An illustration of the optimization of combined cooling heating and power systems using genetic algorithm  
*J Wang, K Yang, X Zhang, G Shi and C Fu* 296
- Technical note**  
Optimising heating system structure using exergy Branch and Bound  
*DJ Fisk* 321
