

Building Services Engineering Research & Technology

Volume 36, Number 3, 2015

Contents

Articles

- Numerical investigations on effects of seven drag reduction components in elbow and T-junction close-coupled pipes
A Li, X Chen and L Chen 295
- Stepwise derivation and verification of a universal elevator round trip time formula for general traffic conditions
L Al-Sharif and AM Abu Alqumsan 311
- Predictive performance of a wastewater source heat pump using artificial neural networks
C Shen, L Yang, X Wang, Y Jiang and Y Yao 331
- The Urban Heat Island in Manchester 1996–2011
GJ Levermore, JB Parkinson, PJ Laycock and S Lindley 343
- A study on the arrangement of air inlets in a Class 7 clean room
LC Ding and YH Yau 357
- A LPV model-based chilled water temperature controller for HVAC systems
J Zhu, Q Yang, X Xu and J Lu 368
- Improving the efficiency of an air conditioning system using a fire water tank as thermal accumulator
CJ Renedo, A Ortiz, S Pérez, F Delgado, I Fernández and J Carcedo 386
