

Building Services Engineering Research & Technology

Volume 34, Number 4, 2013

Contents

Articles

- Prediction of the sound transmission loss of a stiffened window
DY Ou, CM Mak and SM Deng 359
- Evaluation of the thermal performance of an innovative prefabricated natural plant fibre building system
A Shea, K Wall and P Walker 369
- Modelling occurrence and duration of building drainage discharge loads from random and intermittent appliance flushes
KW Mui and LT Wong 381
- Empirical approach to main drain system design and solid transportation performance in buildings
CL Cheng, WJ Liao, KC He, CH Hsieh and YC Liu 393
- Analysis of water sorption and thermal conductivity of expanded polystyrene insulation materials
Á Lakatos and F Kalmár 407
- Effectiveness of an intensive green roof in a sub-tropical region
J Darkwa, G Kokogiannakis and G Suba 417

Technical Note

- A field study of a wastewater source heat pump for domestic hot water heating
S Chao, J Yiqiang, Y Yang, D Shiming and W Xinlei 433
