

# Building Services Engineering Research & Technology

---

## Contents

### Editorial

- Closing the performance gap through better building physics  
*SJ Rees* 125

### Articles

- An alternative general method to evaluate the atmospheric down-welling radiation  
*Y Wang, D Pan, L Wang, E Long and S Deng* 133
- Assessment of the effectiveness and practical feasibility of glass solar chimney walls by open frame in Thailand  
*J Ratanachotinun and P Pairojn* 151
- Computational fluid dynamics study on the drag and flow field differences between the single and coupled bends  
*R Gao, S Chen, A Li, Z Yang and B Cong* 163
- Derivation and verification of the round trip time equation and two performance coefficients for double-deck elevators under incoming traffic conditions  
*L Al-Sharif, E AlOsta, N Abualhomos and Y Suhweil* 176
- Near-extreme summer meteorological data set for sub-tropical climates  
*KK-L Lau, EY-Y Ng, P-W Chan and JC-K Ho* 197
- Quantifying the aggregate thermal performance of UK holiday homes  
*D Johnston, D Farmer and D Miles-Shenton* 209
- Robust anticipative energy management system: Application of a smart building platform  
*M-H Le and S Ploix* 226
