

CONTENTS

Invited Review

- 509 The evolution of cell formation problem methodologies based on recent studies (1997–2008): Review and directions for future research
G. Papaioannou and J.M. Wilson

Discrete Optimization

- 522 A mixed integer linear programming formulation of the maximum betweenness problem
A. Savić, J. Kratica, M. Milanović and D. Dugošija
- 528 A discrete particle swarm optimization method for feature selection in binary classification problems
A. Unler and A. Murat
- 540 Scheduling problems with two competing agents to minimize minmax and minsum earliness measures
B. Mor and G. Mosheiov
- 547 Min sum clustering with penalties
R. Hassin and E. Or
- 555 Online scheduling of malleable parallel jobs with setup times on two identical machines
S. Guo and L. Kang
- 562 An exact algorithm for minimizing resource availability costs in project scheduling
S.B. Rodrigues and D.S. Yamashita
- 569 A turning restriction design problem in urban road networks
J. Long, Z. Gao, H. Zhang and W.Y. Szeto
- 579 Analysis and design of sequencing rules for car sequencing
U. Golle, N. Boysen and F. Rothlauf

Decision Support

- 586 Technology choice under several uncertainty sources
C. Bobtcheff and S. Villeneuve
- 601 The group consensus based evidential reasoning approach for multiple attributive group decision analysis
C. Fu and S.-L. Yang
- 609 No-arbitrage conditions, scenario trees, and multi-asset financial optimization
A. Geyer, M. Hanke and A. Weissensteiner

Innovative Applications of O.R.

- 614 Optimal electronic musical instruments
D. Hartvigsen
- 623 Throughput optimization in robotic cells with input and output machine buffers: A comparative study of two key models
I.G. Drobouchevitch, H. Neil Geismar and C. Sriskandarajah
- 634 Robust network design in telecommunications under polytope demand uncertainty
C. Lemaréchal, A. Ouorou and G. Petrou
- 642 Scheduling elective surgery under uncertainty and downstream capacity constraints
D. Min and Y. Yih
- 653 Valuation of project portfolios: An endogenously discounted method
J.C. Zapata and G.V. Reklaitis
- 667 The selection efficiency of tournaments
D. Ryvkin

Interfaces with Other Disciplines

- 676 Learning intransitive reciprocal relations with kernel methods
T. Pahikkala, W. Waegeman, E. Tsivtsivadze, T. Salakoski and B. De Baets

Continued on last page of this issue

Instructions for Authors

For the submission of papers to the European Journal of Operational Research please consult the Guide for Authors at <http://authors.elsevier.com/locate/ejor>.

Contents continued from the outside back cover

- 686 Time substitution with application to data envelopment analysis
R. Färe, S. Grosskopf and D. Margaritis
- 691 Optimization and analysis of the profitability of tariff structures with two-part tariffs
C. Schlereth, T. Stepanchuk and B. Skiera

Short Communications

- 702 Directional distance functions and slacks-based measures of efficiency: Some clarifications
R. Färe and S. Grosskopf
- 703 A branch-and-bound algorithm to minimize the line length of a two-sided assembly line
H. Xiaofeng, W. Erfei, B. Jinsong and J. Ye
