

CONTENTS

Discrete Optimization

- 323 The impact of distribution system characteristics on computational tractability
A.I. Ali and D.J. O'Connor
- 334 Scheduling incompatible tasks on two machines
I.N. Lushchakova and V.A. Strusevich
- 347 Mathematical programming modeling of the Response Time Variability Problem
A. Corominas, W. Kubiak and R. Pastor
- 358 Scheduling non-professional-table-tennis leagues
S. Knust

Production, Manufacturing and Logistics

- 368 Price discount based on early order commitment in a single manufacturer–multiple retailer supply chain
J. Xie, D. Zhou, J.C. Wei and X. Zhao
- 377 On-line integrated production–distribution scheduling problems with capacitated deliveries
I. Averbakh
- 385 A travel-time model for a person-onboard order picking system
P.J. Parikh and R.D. Meller
- 395 An Improved Genetic Algorithm for the Distributed and Flexible Job-shop Scheduling problem
L. De Giovanni and F. Pezzella
- 409 A multi-structural framework for adaptive supply chain planning and operations control with structure dynamics considerations
D. Ivanov, B. Sokolov and J. Kaeschel
- 421 A fuzzy newsvendor approach to supply chain coordination
K. Ryu and E. Yücesan
- 439 The implications of costs, capacity, and competition on product line selection
C.S. Tang and R. Yin
- 451 A production–inventory model in an imperfect production process
S.S. Sana

Stochastics and Statistics

- 465 *k*-Balanced games and capacities
P. Miranda and M. Grabisch
- 473 Discrete-time queues with discretionary priorities
K. Kim and K.C. Chae
- 486 Optimal pricing and advertising in a durable-good duopoly
A. Krishnamoorthy, A. Prasad and S.P. Sethi
- 498 Nonlinearity, data-snooping, and stock index ETF return predictability
J. Yang, J. Cabrera and T. Wang
- 508 Group-specific stochastic production frontier models with parametric specifications
Y.H. Lee

Decision Support

- 518 A comparative analysis of learning curves: Implications for new technology implementation management
M. Plaza, O.K. Ngwenyama and K. Rohlf
- 529 Approximations of choice probabilities in mixed logit models
N. Kalouptsidis and V. Psaraki
- 536 A dual-interval vertex analysis method and its application to environmental decision making under uncertainty
Y.P. Li, G.H. Huang, P. Guo, Z.F. Yang and S.L. Nie

Continued on last page of this issue

Instructions for Authors

For the submission of papers to the European Journal of Operational Research please consult the Guide for Authors at <http://authors.elsevier.com/locate/ejor>.

Contents continued from the outside back cover

- 551 Optimality of myopic strategies for multi-stock discrete time market with management costs
N. Dokuchaev
- 557 Evolutionary optimization of transition probability matrices for credit decision-making
J. Zhang, V. Avasarala and R. Subbu

Innovative Applications of O.R.

- 568 Quantile regression for robust bank efficiency score estimation
A. Behr
- 582 Revenue management for a supply chain with two streams of customers
Q. Hu, Y. Wei and Y. Xia
- 599 A hybrid optimization approach for multi-level capacitated lot-sizing problems
C. Almeder
- 607 The multicriteria analysis for construction of benchmarkers to support the Clinical Engineering in the Healthcare Technology Management
L. de Moraes, R. Garcia, L. Ensslin, M.J. da Conceição and S.M. de Carvalho

Short communications

- 616 A tuning strategy to avoid blocking and starving in a buffered production line
K. Konishi
- 621 A simple FPTAS for a single-item capacitated economic lot-sizing problem with a monotone cost structure
C.T. Ng, M.Y. Kovalyov and T.C.E. Cheng
- 625 Markov decision processes with multidimensional action spaces
D.G. Pandelis
